Köszönetnyilvánítás

Hálás köszönettel tartozom témavezetőmnek, Dr. Józsi Mihálynak. Már másodévesként sikerült bekapcsolódnom egy nagyon izgalmas kutatásba, aminek már most lett felmutatható eredménye: TDK, cikk és egy kissé más kitekintésű szakdolgozat. Ami viszont az eredményeknél sokkal fontosabb, hogy viszonylag fiatalabbként már bekerülhettem egy ösztönző közegbe, beleláthattam pár dologba, és Misi elindított a kutatói pályámon: szakmai tudás mellett szemléletet kaptam, és az este tíz órakor elküldött irományok is még aznap kijavításra kerültek.

Témavezetőmön kívül a módszerek betanításáért, a sok-sok segítségért és a még annál is több türelemért Csincsi Ádámnak és Dr. Uzonyi Barbarának tartozom köszönettel.
