Rector (Dean)

4. INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1. PROGRAM REQUIREMENTS

4.1.1. Program requirements act number

Ministry of Human Capacities decree 18/2016. (VIII. 5.)

4.1.2. Aim of study

The aim of the programme is to educate finance and accounting professionals, who have theoretically well-founded, state-of-the-art, internationally applicable financial, business, and economic knowledge, and have acquired solid theoretical and practical methodological skills in financial and accounting systems. Graduates are able to present and apply realistic data and to develop knowledge capital as an organisational asset. They have an overview of the financial and accounting systems and are capable of managing and developing these. Moreover, they are capable of taking strategic decisions and can apply state-of-the-art planning, management, accounting and controlling methodologies and are prepared to shape the institutional requirements, oversee and manage the financial information systems of international, national and regional institutions. Graduates are also capable of determining the present position for development goals and providing proposals for the realization of these goals. Graduates will have obtained all the knowledge and skills required to continue their studies at the master level.

4.1.3. Required number of credit points (ECTS)

210

4.1.4. System of knowledge checking

Exams, submission and successful defence of a Thesis Work. Diploma requirements: Absolutorium, final examination, and at least one a state accredited intermediate (B2, complex) study program related professional foreign language exam, or a general, advanced foreign language exam (C1, complex) or a matriculation or degree certificate equivalent to this.

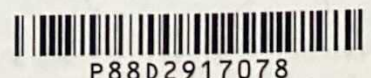

4.1.5. Required professional practice, credit value

Mandatory, uninterrupted, one semester internship.

4.2. PROGRAM DETAILS AND THE INDIVIDUAL GRADES / MARKS / ECTS CREDITS OBTAINED

4.2.1. Knowledge acquired during the programme of study (requirement, credit points, grades)

*Lessons per week (W) / semester (S) *If the number of lessons contains / marks, like in le/p/ly, its meaning is: number of lectures/class practices/laboratories.

Number of credits: 217

4.2.2. Previously acquired knowledge and knowledge acquired during parallel or exchange programmes of study (requirement, credit points)

Subject name	Subject code	Recognised	Requirement	Credit	Grade	Date
--------------	--------------	------------	-------------	--------	-------	------

Number of credits: 0

4.2.3. Recognised knowledge acquired informally or professional work experience and other experience (requirement, credit points)

Subject name	Subject code	Recognised	Requirement	Credit	Grade	Date
--------------	--------------	------------	-------------	--------	-------	------

Number of credits: 0

4.3. Grading scheme and, if available, grade distribution guidance

Assessment of the knowledge of the curriculum occurs in five grades: excellent(5), good (4), satisfactory (3), pass (2), and fail (1).

4.4. Overall classification of the qualification

very good (4,57)

5. INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1. Access to further study

Continue studies at master level (MA/MSc) and in post graduate specialist training programs.

5.2. Professional status (if applicable)

The specialization in finance ensures that students have proper understanding of the basic financial contexts and are able to solve complex financial problems. The specialization provides a deeper insight into corporate financial planning, financial data analysis, and financial markets. Students become familiar with the main issues related to stock market transactions, venture capital investments, portfolio optimization, M&A transactions (mergers and acquisitions) and business valuation. Students graduating from the specialization gain a strong financial foundation building on deep methodological knowledge.

6 ADDITIONAL INFORMATION

6.1. Information concerning the holder of the diploma

6.2. Information on the Institution

With its history going back one hundred years, Corvinus University of Budapest is the most excellent institute of education in Hungary in the field of economics and social studies. Our University currently awaits its students interested in economics, social studies, information technology, agricultural studies and teacher training with three types of courses, in three languages, with 13 bachelor programmes, 21 master programmes, 1 complex programme, 7 doctoral programmes, 3 MBA programmes and 43 specialised further education programmes.

We believe in continuous development and that we should not be satisfied by the results achieved so far. For this very reason Corvinus University became a foundation-funded university instead of a state-funded university as of July 2019. The foundation-based model allows more resilient operation and a predictable planning opportunity. Our objective is no less than turning Corvinus into an international university and turning Corvinus into the leading institution of Central Europe in the fields of economic and social studies by 2030.

According to the rankings, Corvinus is already one of the best universities of the region: based on the 2019 survey of Eduniversal, the Corvinus Business School is the best business school of Eastern Europe, while the Master's in International Management programme offered in cooperation with CEMS was chosen by the Financial Times as the eighth best programme among such programmes in the world.

Our University has widespread international relations, and our business management and economics programmes have prestigious international accreditations (EQUIS, EPAS, BSIS Label, EAPAA). Owing to our EQUIS accreditation, our business management programmes belong to the top 2% of the world's universities offering business management programmes.

In addition, training the social and economic elite of the region is one of our important objectives. What we want is that talented students did not have to choose a foreign university in order to acquire internationally acknowledged, competitive and marketable knowledge. At our university only talent and ambition counts, and the social and financial situation cannot be obstacles to education: we created the Corvinus scholarship programme in order to allow our best and most talented students to study on excellence basis and free of charge.

Corvinus means quality and opportunities: up-to-date and useful knowledge, practice-oriented programmes, widespread social capital, diploma of stable value, career opportunity, community, as well as higher starter wage on the labour market.
