Dear Dr. Kolossvary,

It is our pleasure to inform you that your abstract (control no.:7765) entitled „ASSESSMENT of NEURODEVELOPMENTAL OUTCOME IN TERM ASPHIXIATED NEONATES, TREATED WITH HYPOTHERMIA, USING TRACT-BASED SPATIAL STATISTICS" **was accepted for EPOS™**, ESR's Electronic Presentation Online System!
Congratulations!

To make your presentation part of the electronic scientific exhibition, you are now kindly asked to

1. **confirm your publication / balance the publication fee** and
2. **upload your poster material (text, images, movies, etc.) to EPOS™**
(ECR 2012 Poster submission deadline: 31.01.2012)

Poster confirmation / Publication Fee:

Authors benefit from their EPOS™ publications all year long. The **first publication is free of charge**, for subsequent posters there is a small publication fee to be paid by the submitting author. The charge is €25 per poster for ESR members or €45 per poster for non-members.

The poster confirmation / publication fee includes:

- Activation of poster upload to the EPOS™ system
- Online publication of the poster as soon as the editorial office has approved of the submitted poster
- DOI registration (digital object identifier – citable, internationally standardized number to identify electronically published material)
- Certificate of Publication, available to the presenting author via the MyUserArea as soon as the poster has a DOI (mean: 3 weeks after submission), which officially confirms the publication of the poster by the listed author(s)

To confirm the publication of your poster / pay the publication fee and start your poster upload please go to the **My User Area** at www.myESR.org/MyUserArea and log in with your ESR details:

Under '**My Poster Publication**', you will find a list of your accepted submissions – please select the poster you would like to process and follow the instructions given by the system. Payment must be made by credit card (Visa, Mastercard).

Please note that the poster confirmation /publication fee does not cover the poster presentation at ECR 2012!

Poster Upload:

As soon as you have paid the publication fee, you will receive further instructions including a link with login data for the EPOS™ upload system. Please note that the ECR 2012 poster submission deadline is January 31!

To avoid any misunderstandings, we would like to point out that all presentations will be exclusively displayed in a standardized electronic format at www.myESR.org/epos - please take a look at our [sample poster](#). EPOS presentations cannot be uploaded as .ppt or .pdf files.

Review feedback

The decision of acceptance or rejection of an abstract is mainly based on the overall rating score, but as additional information to this score reviewers can indicate specific weaknesses in a submitted abstract (which is of course very limited) via checkboxes. As a feedback for you and to give you the possibility to address stated concerns in the full poster (i.e. explain in more detail what is new about your findings, why a certain procedure was preferred over an alternative one, why you drew the stated conclusions based on your results, etc.), please find any indicated weaknesses listed below. Please note that these are predetermined default wordings, not the reviewers' own words.

Indicated weaknesses of the abstract:

Conclusions are not sound (x1)

Your poster at ECR 2012:

Posters will be included in the ECR 2012 electronic poster exhibition if the presenting author is registered for the congress and the poster is submitted by January 31. Before the congress, the Scientific Exhibition Jury will evaluate uploaded posters and present awards (Magna Cum Laude, Cum Laude, Certificate of Merit) to the best ones.

In addition, authors of the awarded and best-rated posters will be asked to present their work in person at ECR 2012, in the EPOS area, during moderated events. These presented posters will receive an official diploma and prize at ECR 2012.

Please do not hesitate to contact epos@myESR.org if you have any questions!

Your EPOS™ team

Lisa Loibl
