Dear MÁTÉ VASS,

I like to inform you that your paper

MÁTÉ VASS, ÁGNES RÉVAY, TAMÁS KUCSERKA, KATALIN HUBAI, VIKTÓRIA ÜVEGES, KATA KOVÁCS and JUDIT PADISÁK
Aquatic Hyphomycetes as Survivors and/or First Colonizers after a Red Sludge Disaster in the Torna Stream, Hungary

was accepted by the IRH in general, but some details of the methods should be cleared. I will come back tomorrow with some questions. You can quote it as "in press".

In the moment it is not possible to give a DOI number to that paper, because this should be done to all papers together of that special issue (PLPF6 in Crakow),

Best wishes

Norbert Walz

Dear Norbert,
the below conversation refers to a paper in one of your special issues. Since it is indeed important to get a decision letter soon, please have a look at and provide some response. Moreover, in case of acceptance, it is essential to know when the ms will be displayed with a DOI on-line.
Thanks for your response in advance and best wishes,
Judit

Dear Tadeusz,

I'm just curious about my research paper. What is the current status of our article (Aquatic hyphomycetes as survivors and/or first colonizers after a red sludge disaster in the Torna stream, Hungary)? Last time the two reviewers accepted it, but since then I don't know what happened.
I ask you because it's important for me for a student proposal.

Sincerely,
Máté Vass
