Dear Dr. Radovits:

The editors are pleased to inform you that your manuscript, H-00108-2013R2, entitled "Rat model of exercise-induced cardiac hypertrophy - hemodynamic characterization using left ventricular pressure-volume analysis," has been accepted for publication in AJP-Heart and Circulatory Physiology as a Research Article. The editors commend you on your outstanding contribution to the journal. Your manuscript can be published online ahead of print in AiPS (Article in Press) within approximately two weeks.

Please note that your manuscript files will be processed through our internal quality control checks. If any text or figure files are not in order, online publication may be delayed. Note also that your manuscript will be published in AiPS (Articles in Press) as it was submitted. Author names and article content is not copyedited prior to online AiPS publication.

AJP-Heart and Circulatory Physiology is the official journal of the Cardiovascular Section of the American Physiological Society. My fellow editors and I encourage you to become a member of the Cardiovascular Section. The mission of the CV Section is to further the cardiovascular disciplines by supporting scientific programming at the annual Experimental Biology meeting, by encouraging the activities of younger members and by recognizing the achievements of members with an active awards program. More information about awards and membership is available online at <http://www.the-aps.org/sections/cardio/index.htm>.

Congratulations on your accepted work! We would like to thank you for contributing this novel and important article to AJP-Heart and Circulatory Physiology, as well as for your time, effort and continued support of the journal.

Sincerely,

Leon J. de Windt, PhD
Associate Editor
AJP-Heart and Circulatory Physiology

Open Access Author Choice

Traditionally, articles published online in this journal are available through subscription or pay per view for one year, and are then made free to all, or open access, 12 months after publication. Now you can choose to allow immediate open access for your research article by paying a fee (\$2000). The fee is \$3000 for review articles. The payment form can be found at <http://www.the-aps.org/authorchoice/pdf/form.pdf>. For more information, please see: <http://www.authorchoice.org>.

Important Information about the NIH Public Access Requirement and Your Manuscript

Under the NIH Public Access Policy, NIH is requiring that its funded investigators submit to PubMed Central (PMC) all manuscripts accepted after April 7, 2008, resulting from research supported in whole or in part with direct costs from NIH.

If you are NIH funded, APS will upload the final published article to PMC for you; you do not need to do anything more to meet this requirement. APS will have PMC make the article free 12 months after final publication. This period of time is consistent with our existing policy to make all content publicly available through HighWire Press 12 months after print publication, and keeps you in compliance with your copyright agreement with APS.

Other Funding Agencies that require posting to PMC

If you are funded by a different funding agency, such as the Wellcome Trust, that requires posting to PMC, APS will submit your article to PMC for you. If that agency also requires that access be made free before 12 months, you are required to pay an AuthorChoice fee, which will allow your article to be made free on the Journal site and in PMC immediately upon receipt of payment. Please click on the AuthorChoice link for the payment form:

<http://www.the-aps.org/authorchoice/pdf/form.pdf>

If you have any questions with respect to the NIH Public Access Policy or other funding agencies' policies and the publication of your article in an APS journal, please see:

<http://www.the-aps.org/mm/Publications/Funding-Agencies>
