

IBRO Workshop 2014

**Debrecen
16-17 January 2014
Hungary**

Organizing Committee

Chair:

Miklós Antal, MD, PhD, DSc

Department of Anatomy, Histology and Embryology
Faculty of Medicine
Medical and Health Science Center
University of Debrecen
Debrecen, Hungary

Members:

Zoltán Király, MSc
Zoltán Kisvárdy, PhD, DSc
Klára Matesz, MD, PhD, DSc
Ervin Wolf, PhD

Department of Anatomy, Histology and Embryology
Faculty of Medicine
Medical and Health Science Center
University of Debrecen
Debrecen, Hungary

Program Committee

Chair:

Miklós Antal, MD, PhD, DSc

Department of Anatomy, Histology and Embryology
Faculty of Medicine
Medical and Health Science Center
University of Debrecen
Debrecen, Hungary

Members:

Alán Alpár, MD, PhD

Department of Anatomy, Histology and Embryology
Semmelweis University
Budapest, Hungary

László Csiba, MD, PhD, DSc

Department of Neurology
Faculty of Medicine
Medical and Health Science Center
University of Debrecen
Debrecen, Hungary

Csaba Fekete, MD, PhD, DSc

Department of Endocrine Neurobiology
Institute of Experimental Medicine
Hungarian Academy of Sciences
Budapest, Hungary

Zoltán Kisvárday, PhD, DSc

Department of Anatomy, Histology and Embryology
Faculty of Medicine
Medical and Health Science Center
University of Debrecen
Debrecen, Hungary

Gábor Tamás, PhD, DSc, MHAS

Research Group for Cortical Microcircuits
Department of Physiology, Anatomy and Neuroscience
University of Szeged
Szeged, Hungary

István Ulbert, MD, PhD

Institute for Cognitive Neuroscience and Psychology
Research Centre for Natural Sciences
Hungarian Academy of Sciences
Faculty of Information Technology
Péter Pázmány Catholic University
Budapest, Hungary

Sponsors

International Brain Research Organization (CEERC)

Richter Gedeon Zrt.

University of Debrecen

Medical and Health Science Center, University of Debrecen

Exhibitors

3DHistech Kft.

Auro-Science Consulting Kft.

BioMarker Kft.

Biomedica Hungary Kft.

Carl Zeiss Technika Kft.

Neuronelektród Kft.

Supertech Kft.

Unicam Magyarország Kft.

VWR International Kft.

Conference organizers

Ekho '94 Kft.

4032 Debrecen, Babits. M. u. 8.

Phone: +36 52 537 537, Fax: +36 52 538 538

E-mail: ekho94@t-online.hu

István Krompecher Foundation

4012 Debrecen Nagyerdei krt. 98

Phone: +36 52 255 567, Fax: +36 52 255 115

The organizers are grateful to all sponsors and exhibitors whose financial support contributed to the success of the IBRO Workshop 2014.

General information

Congress venue

University of Debrecen (UD), Life Science Building, Debrecen, Egyetem tér 1.

Congress office, registration desk

UD, Entrance Foyer of Life Science Building.

Debrecen, Egyetem tér 1.

Opening hours:

Thursday, 16 January 2014 8:00-19:30

Friday, 17 January 2014 8:00-18:30

Oral presentations

Plenary lectures 45'+15' discussion

Symposia 120' including discussion

Poster presentations

The posters are exhibited in the Entrance Foyer of Life Science Building, UD. Size of poster boards: 90 cm (horizontal) x 150 cm (vertical).

Posters should be set up at 8:00-9:00 AM on the day of display and must be removed at the end of the day. Mounting material will be provided by the organizers.

The poster boards are numbered. The numbers of the boards correspond to the numbers of posters as they are listed in the program book.

Accommodation

According to previous reservation.

Please contact the congress office for further information (EKHO '94 Kft. Debrecen, Babits M. u. 8., Phone: 52-537-537).

Meals

During coffee and lunch breaks coffee and soft drinks will be offered. Price included in the registration fee.

Social events:

Cultural event (free for registered participants)

16 January, 20:00 Liszt Hall of the Faculty of Music, UD, Egyetem tér 1.

Get-together party

17 January, 19:30 Main Building of UD, Egyetem tér 1.

Program at a Glance

16 January

9:00 – 9:15 **Opening Ceremony**

9:15 – 10:15 **Plenary lecture I. Buzsaki Lecture**

Giacomo Rizzolatti (Department of Neuroscience,
University of Parma, Italy)

The mirror neuron mechanism and its role in understanding others

10:15 – 10:30 **Coffee break**

10:30 – 12:30 **Symposium I.**

Dissecting fear circuits in rodents

Moderator: Attila Losonczy (Department of Neuroscience,
Columbia University, New York, USA)

Francesco Ferragutti (Medical University, Innsbruck, Austria)

Novel insight into fear-mediated structural plasticity at GABAergic synapses of the basolateral amygdala

Marco Capogna (MRC Anatomical Neuropharmacology Unit,
Oxford, UK)

Hippocampal and somatosensory inputs to the basolateral amygdala:
role of identified GABAergic neurons

Norbert Hajos (Institute of Experimental Medicine,
Hungarian Academy of Sciences, Budapest, Hungary)

Structural and functional organization of inhibitory microcircuits in
the basolateral amygdala

Attila Losonczy (Department of Neuroscience, Columbia University,
New York, USA)

Dendritic inhibition protects hippocampal output during fear learning

12:30 – 15:30 **Poster session I. / Lunch break**

15:30 – 16:30 **Plenary lecture II.**

Hans Ulrich Zeilhofer (Institute of Pharmacology and Toxicology,
University of Zurich, Switzerland)
Cellular and molecular basis of spinal pain control

16:30 – 16:45 **Coffee break**

16:45 – 18:45 **Symposium II.**

Regeneration in the injured spinal cord – hopes and perspectives

Moderator: Antal Nógrádi (Department of Anatomy,
University of Szeged, Hungary)

Thomas Becker (Centre for Neuroregeneration,
University of Edinburgh, UK)
Successful spinal cord regeneration in adult zebra fish

Urszula Slawinska (Nencki Institute of Experimental Biology and
Institute of Biocybernetics and Biomedical Engineering, Warsaw,
Poland) and

Larry Jordan (Department of Physiology, Spinal Cord Research
Centre, The University of Manitoba, Winnipeg, Canada)
The role of serotonin in locomotor recovery after spinal cord injury
in rats

Laurent Vinay (Institute de Neurosciences de la Timone,
Marseille, France)
New perspectives for the treatment of spasticity and chronic pain after
spinal cord injury

Krisztián Pajer (Department of Anatomy,
University of Szeged, Hungary)
Recovery and regeneration in the injured rodent cord induced by
grafted stem cells: multiple mechanisms

20:00 - 21:30 **Cultural event**

17 January

9:00 – 10:00 **Plenary lecture III. IBRO Lecture**

Arthur Konnerth (Institute of Neuroscience, Technical University
Munich, Germany)
Dendritic integration in cortical neurons in vivo

10:00 – 10:15 **Coffee break**

10:15 – 12:15 **Symposium III.**

Complementary approaches in super-resolution microscopy:
new insights on synaptic organization and plasticity

Moderator: István Katona
(Institute of Experimental Medicine, Hungarian Academy of
Sciences, Budapest, Hungary)

Stefan Sigrist (Institute for Biology and Genetics, Freie Universit t,
Berlin, Germany)
Shedding light on the functional anatomy of presynaptic active zones

Valentin Nagerl (Institut Interdisciplinaire de NeuroSciences,
Universit  Bordraux, France)
Imaging the plasticity of living synapses at the nanoscale by
two-photon excitation STED microscopy

Thomas Blanpied (Department of Physiology, University of
Maryland School of Medicine, Baltimore, Maryland, USA)
Postsynaptic molecular organization and dynamics at single living
synapses resolved by PALM microscopy

István Katona (Institute of Experimental Medicine, Hungarian
Academy of Sciences, Budapest, Hungary)
Cell type- and synapse specific molecular imaging by STORM
microscopy in brain circuits

12:15 – 15:15 **Poster session II / Lunch break**

15:15 – 16:15 **Plenary Lecture IV**

T bor Hark ny

(Div. Mol. Neurobiol., Dept. Med. Biochem. Biophys., Karolinska Institutet, Stockholm Sweden)
Molecular interrogation of endocannabinoid signaling in relation to cannabis sensitivity of the developing nervous system

16:15 – 18:15 **Symposium IV**

The Versatile Roles of the Extracellular Matrix in the Central Nervous System

Moderator: Alan Alpar

(Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary)

Markus Morawski (Paul Flechsig Institute, Leipzig, Germany)
HyaluronanBased ECM-Implications for Physiological Functions

Heikki Rauvala (Neuroscience Center, University of Helsinki, Finland)

RAGE-mediated cell signalling in health and disease

Renato Frischknecht (Leibnitz Institute, Magdeburg, Germany)
Role of the Perisynaptic Extracellular Matrix in Synaptic Plasticity

Klára Matesz (Department of Anatomy, Histology and Embryology, University of Debrecen, Hungary)
Compensation Following Vestibular Disorder: Possible Role of the Extracellular Matrix

18:15 – 18:30 **Closing remarks**

19:30 - **Reception**

POSTERS

16 January

Molecular and cellular neurobiology: P1 – P17a

Sensory and motor systems: P18 – P56a

Behavior and cognition: P57 – P102i

17 January

Synaptic transmission and integration: P103 – P119c

Neuroendocrinology: P120 – P142a

Developmental neurobiology: P143 – P147a

Disorders of the nervous system: P148 – P181b

Methods: P182 – P200b

16 January

MOLECULAR AND CELLULAR NEUROBIOLOGY

P1. Functional Characterization of Genetically Identified Cholinergic Neurons in the Pedunculopontine Nucleus of Mice

Csilla Bordás, Áron Kőszeghy, Éva Kókai, Lilla Oláh, Péter Szücs, Balázs Pál

University of Debrecen, MHSC, Department of Physiology; Debrecen, Hungary

P2. Modulation of Action Potential-Triggered Dendritic Calcium Signals by Local Membrane Parameters in Dentate Gyrus Granule Cells

János Brunner, János Szabadics

Institute of Experimental Medicine – Hungarian Academy of Sciences, Budapest, Hungary

P3. Hippocampal sharp waves associated dendritic calcium transients and high frequency oscillations in parvalbumin interneurons

Balázs Chiovini^{1,2}, Gergely F. Turi^{1,4}, Dénes Pálfi², Attila Kaszás^{1,2}, Pál Maák³, Gergely Katona¹, Gábor Szabó¹, Gergely Szalay¹, Zoltán Szadai¹, Miklós Madarász², Szabolcs Káli¹, Balázs Rózsa^{1,2}

¹ *Two-Photon Imaging Center, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary.*

² *The Faculty of Information Technology, Pázmány Péter Catholic University, Budapest, Hungary.*

³ *Department of Atomic Physics, Budapest University of Technology and Economics, Budapest, Hungary.*

⁴ *Department of Neuroscience, Columbia University, New York, USA*

P4. Synthesis and in vitro pharmacological characterization of opiate-cannabinoid bivalent ligands

Szabolcs Dvoracsko^a, Robert Berkecz^b, Eva V. Varga^c, Csaba Tomboly^a, Attila Keresztes^a

^a *HAS-BRC, Institute of Biochemistry, Szeged, Hungary*

^b *University of Szeged, Department of Medical Chemistry, Szeged, Hungary*

^c *University of Arizona, Department of Pharmacology, Tucson, USA*

P5. Astrocytic activation, interleukin-1 receptor type 1 expression and interleukin-1 beta production upon glutamate and ATP treatment

Gajtkó Andrea, Holló Krisztina, Bakk Erzsébet, Hegedűs Krisztina, Antal Miklós

Department of Anatomy, Histology and Embryology, Medical and Health Science Center, University of Debrecen, Debrecen, Hungary

P6. Subcellular distribution of voltage-gated potassium channels on CA1 pyramidal cells

Tekla Kirizs, Andrea Lőrincz, Zoltán Nusser

Laboratory of Cellular Neurophysiology, Institute of Experimental Medicine, Hungarian Academy of Sciences; Budapest; Hungary

P7. KCNQ4 is the Major M-Current Subunit of Cholinergic Neurons in the Pedunculopontine Nucleus (PPN)

Adrienn Kovács, Áron Kőszeghy, Csilla Bordás, Éva Kókai, Lilla Oláh, Péter Szücs, Balázs Pál

University of Debrecen, MHSC, Department of Physiology; Debrecen; Hungary

P8. Endocannabinoid Signaling Modulates Neurons of the Pedunculopontine Nucleus (PPN) via Actions on the Neuron-Glia Communication

Áron Kőszeghy^{1*}; Adrienn Kovács^{1*}; Tamás Bíró^{1, 2}; Zoltán Hegyi³, Miklós Antal³, Balázs Pál¹

¹*Department of Physiology, University of Debrecen, Medical and Health Sciences Centre; Debrecen; Hungary*

²*„DE-MTA Lendület” Cellular Physiology Research Group of the Hungarian Academy of Sciences; Debrecen; Hungary*

³*Department of Anatomy, University of Debrecen, Medical and Health Sciences Centre; Debrecen; Hungary*

**These authors contributed equally to this work.*

P9. Morphological analysis of electrophysiologically characterized glutamatergic cells in the Median Raphe

Tamás Laszlovszky, Andor Domonkos, Litsa Nikitidou, Csaba Cserép, Gábor Nyíri, Tamás Freund, Viktor Varga

Institute of Experimental Medicine of HAS, Budapest, Hungary

P10. Similarities and differences in presynaptic Ca²⁺ transients of hippocampal interneurons

Lőrincz T., Kiszfali M., Sós K.E., Vizi E.S.

Department of Pharmacology, Institute of Experimental Medicine – HAS, Budapest, Hungary

P11. GABA_A Beta3_Alpha5 Concatenate: Utility for Ligand-Binding and Functional Assays

Adrienn Pálvölgyi, Balázs Mihalik, Gábor Kapus, Miklós Végh, Katalin Pallagi, Lilla Papp, Ferenc A. Antoni

Laboratory of Molecular Pharmacology, Division of Preclinical Research, Egis Pharmaceuticals PLC, Budapest, Hungary

P12. Effect of resolvins on Transient Receptor Potential ion channel activation

M. Payrits, É. Sághy, É. Szőke, T. Bagoly, Zs. Helyes, J. Szolcsányi
Department of Pharmacology and Pharmacotherapy, Szentágotthai Research Center, University of Pécs; Pécs; Hungary

P13. A GABAergic communication pathway from individual neurons to glial cells

Márton Rózsa¹, Gergely Katona², Balázs Rózsa², Gábor Tamás¹

¹*Research Group for Cortical Microcircuits of the Hungarian Academy of Sciences, Department of Physiology, Anatomy and Neuroscience, University of Szeged, Közép fasor 52, Szeged, H-6726, Hungary*

²*Two-Photon Imaging Center, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

P14. Role of semicarbazide-sensitive amine oxidase (SSAO) inhibitors on TRP ion channel activation

É. Sághy¹, M. Payrits¹, É. Szőke¹, T. Bagoly¹, P. Mátyus², R. Deme², Zs. Helyes¹

¹*Department of Pharmacology and Pharmacotherapy, Szentágotthai Research Center, University of Pécs; Pécs; Hungary;* ²*Department of Organic Chemistry, University of Semmelweis; Budapest; Hungary*

P15. Effect of Enkephalin-Conotoxin Hybrid Peptides on Opioid Receptors

Reza Samavati¹, Adriano Mollica², Ferenc Zádor¹, Anna Borsodi¹, Sándor Benyhe¹

¹*Institute of Biochemistry, Biological Research Centre, Hungarian Academy of Sciences, Szeged, Hungary*

²*Dipartimento di Farmacia, Università di Chieti-Pescara “G. d’Annunzio”, Chieti, Italy*

P16. The role of state-dependent affinity and accessibility in sodium channel inhibitor effects

Szabo AK, Karoly R, Lenkey N, Mike A

Institute of Experimental Medicine, Budapest, Hungary

P17. Three-dimensional population Ca²⁺ measurement from *in toto* preparation during rhythmic oscillations reveals cell type specific firing properties

Szalay G.², Kaszás A.^{1,2}, Nagy R.^{1,2}, Katona G.², Maák P.³, Veress M.³, Spitzer K.^{1,2}, Pálfi D.¹, Chiovini B.², Bernard C.⁴, Rózsa B.^{1,2}

¹*Pázmány Péter Catholic University, Faculty of Information Technology, Budapest, Hungary*

²*Institute for Experimental Medicine of the Hungarian Academy of Sciences, Two-photon Imaging Center, Budapest, Hungary*

³*Department of Atomic Physics, Budapest University of Technology and Economics, Budapest, Hungary*

⁴*INSERM U751, Faculté de Médecine de la Timone, Marseille, France*

P17a. Retinal aging in the diurnal Chilean rodent, *Octodon degus*

Szabadfi K.¹, Gabriel R.¹, Setalo Gy.Jr.², Tarragon E.³, Estrada C.³, Lopez D.³, Ros C.M.³, Reglodi D.⁴, Tamas A.⁴, Herrero M.T.³

Departments of ¹Experimental Zoology and Neurobiology, ²Medical Biology, ⁴Anatomy, PTE-MTA “Lendulet” Research Group, University of Pecs, Pecs, Hungary; ³Clinical and Experimental Neuroscience (NiCE) and Centro de Investigacion Biomedica en Red sobre Enfermedades Neurodegenerativas (CIBERNED), School of Medicine, University Jaume I and University of Murcia, Murcia, Spain

SENSORY AND MOTOR SYSTEMS

P18. Molecular dynamics study of the structural basis of dysfunction and the modulation of reactive oxygen species generation by pathogenic mutants of human dihydrolipoamide dehydrogenase

Ambrus A¹, Adam-Vizi V¹

¹*Department of Medical Biochemistry, Semmelweis University, Budapest, Hungary*

P19. Projection Neurons in the LSN and Lateral Spinal Lamina I Are Subject to Propriospinal Ascending Mono- and Polysynaptic Excitation

Zsófia Antal¹, Liliana Luz^{2,3}, Boris Safronov², Miklos Antal¹, Peter Szucs⁴

¹*Department of Anatomy, Histology and Embryology, UD MHSC, Debrecen, Hungary*

²*Spinal Neuronal Networks, IBMC, Porto, Portugal*

³*Departamento de Biologia Experimental, FMUP, Porto, Portugal*

⁴*Department of Physiology, UD MHSC, Debrecen, Hungary*

P20. The role of different regimens of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) treatment in neurochemical changes of mice striatum

Mária Baranyi, Beáta Sperlág

Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary

P21. Localization of CD26/DPP4 enzyme and the effects of its inhibitors in the rat spinal cord

Benjamin Barta¹, Shiva Kouhnavardi¹, Márk Kozsurek¹, Kornél Király², Erika Lukácsi¹, Csaba Fekete³, Zita Puskár¹

¹*Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest*

²*Department of Pharmacology and Pharmacotherapy, Semmelweis University, Budapest*

³*Lendület Laboratory of Integrative Neuroendocrinology, KOKI, HAS, Budapest*

P22. TNF-alpha pretreatment improves the neuronal differentiation and integration of grafted embryonic spinal cord: a morphological study

Tamás Bellák¹, Krisztián Pajer¹, József Maléth², Antal Nógrádi¹

¹*Department of Anatomy, Histology and Embryology, Faculty of Medicine, University of Szeged, Szeged, Hungary*

²*First Department of Medicine, Albert Szent-Györgyi Clinical Centre, University of Szeged, Szeged, Hungary*

P23. Flickering Light Stimulation Affects Global Form Detection, but not Global Motion Detection

Gábor Braunitzer, Attila Nagy, Attila Őze, Tibor Nagy, András Pusztai, György Benedek, Szabolcs Kéri *University of Szeged, Faculty of Medicine, Department of Physiology, Szeged, Hungary*

P24. Lamotrigine is more effective than riluzole in rescuing motor unit numbers and muscle properties after sciatic nerve crush in neonatal rats

Cabaj A. M.¹, Sławińska U.²

¹*Institute of Biocybernetics and Biomedical Engineering PAS, Warsaw, Poland*

²*Nencki Institute of Experimental Biology*

P25. The influence of acoustic stimuli ranging from 81-120dB on the startle reflex in rat: determination of acoustic startle response threshold level

Cecília Csölle, István Gyertyán

Department of Behavioural Pharmacology, Richter Nyrt, Budapest, Hungary

P26. Endogenous vanilloids are putative activators of the trigeminal nociceptor complex: relevance to headache mechanisms

É. Deák, Á. Martonosi, G. Jancsó, M. Dux

Department of Physiology, University of Szeged, Szeged, Hungary

P27. Spinal expression of interleukin-1 receptor type 1 in an animal model of chronic inflammatory pain

László Ducza, Krisztina Holló, Erzsébet Bakk, Krisztina Hegedűs, Zoltán Hegyi, Klaudia Dócs, Miklós Antal

Department of Anatomy, Histology and Embryology, Medical and Health Science Center, University of Debrecen, Debrecen, Hungary

P28. Kanamycin-induced changes in calcium-binding protein expression in the inner ear of wild type, heterozygous and homozygous pituitary adenylate cyclase activating polypeptide (PACAP)-deficient mice

B. Fülöp¹, A. Németh², K. Szabadfi³, B. Szalontai³, D. Reglődi¹, J. Farkas¹, P. Kiss¹, H. Hashimoto⁴, A. Baba⁴, R. Gábel³, A. Tamás¹

¹*Department of Anatomy, PTE-MTA „Lendület” PACAP Research Team,* ²*Department of Otorhinolaryngology,* ³*Experimental Zoology and Neurobiology, University of Pécs, Pécs, Hungary;* ⁴*Graduate School of Pharmacological Sciences, Osaka University, Osaka, Japan*

P29. Effect of unilateral labyrinthectomy on brevicin expression in the vestibular nuclear complex of the rat

Botond Gaál, Szilvia Kecskés, Amit Dattani, Einar Örn

Jóhannesson, Éva Rácz, Klára Matesz

Department of Anatomy, Histology and Embryology, University of Debrecen, MHSC, Debrecen, Hungary

P30. Integration of grafted embryonic motoneurons into the host spinal cord circuitry after lumbar 4 ventral root avulsion and reimplantation

László Gál^{1,2}, Gábor Márton², Antal Nógrádi², Urszula Slawinska¹

¹*Interinstitute Laboratory of Neuromuscular Plasticity, The Nencki Institute of Experimental Biology, Warsaw, Poland,* ²*Department of Anatomy, Histology and Embryology, Faculty of Medicine, University of Szeged, Hungary*

P31. The relationship between the internal clock and reaction time

*Gábor H., **Murgia M., **Prpic V., **De Tommaso M., *Gábor J., **Agostini T.

** Institute of Physiology, University of Pécs, Pécs, Hungary*

*** Department of Life Sciences, University of Trieste, Italy*

P32. The nature of cortical layer 5 input to the basal ganglia recipient motor thalamus

Hadinger N., Bokor H, Acsády L

Institute of Experimental Medicine of the Hungarian Academy of Sciences, Budapest, Hungary

P33. Evoked responses elicited by acoustic and MGB electrical stimulation in the cat

Domonkos Horváth, Richárd Fiáth, Wittner Lucia, István Ulbert, György Karmos

Institute of Cognitive Neuroscience and Psychology, Research Centre for Natural Sciences, Hungarian Academy of Sciences, Budapest, Hungary

Faculty of Information Technology, Pázmány Péter Catholic University, Budapest, Hungary

P34. Thermoregulatory and motor disturbances after intrathecal injections in freely moving rats

Horvath G., [#]Safrany-Fark A., Petrovszki Z., Kekesi G., Benedek G.

Department of Physiology, [#]Department of Orthodontics and Pediatric Dentistry, Faculty of Dentistry, University of Szeged, Szeged, Hungary

P35. The Analgesic Action of P2Y₁₂ Receptor Antagonists in Animal Models of Inflammatory and Neuropathic Pain

Gergely Horváth^{1,2}, Beáta Sperlág¹

¹*Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

²*János Szentágothai School of Neurosciences, Semmelweis University, Budapest, Hungary*

P36. Differential expression patterns of K⁺/Cl⁻ co-transporter (KCC2) in neurons within the superficial spinal dorsal horn of rats

Fariba Javdani^{1*}, Krisztina Holló¹, Krisztina Hegedüs¹, Gréta Kis¹, Zoltán Hegyi¹, Yu Kasugai², Yugo Fukazawa², Ryuichi Shigemoto², Miklós Antal¹

¹*Department of Anatomy, Histology and Embryology, Faculty of Medicine, Medical and Health Science Center, University of Debrecen, Debrecen, Hungary,*

²*Division of Cerebral Structures, National Institutes for Physiological Sciences, Myodaiji, Okazaki, Japan.*

P37. Contribution of nitric oxide to odor-elicited behavior in the snail, *Helix pomatia*. An *in vitro* and *in vivo* study

Kálmán Nacsá¹, Zoltán Veréb², Károly Elekes¹, Zoltán Serfőző^{1*}

¹*Department of Experimental Zoology, Balaton Limnological Institute, Centre for Ecological Research, Hungarian Academy of Sciences, Tihany, Hungary*

²*Institute of Biochemistry and Molecular Biology, Medical and Health Science Center, University of Debrecen, Debrecen, Hungary*

P38. TNAP Activity is localized in critical Sites of retinal Neurotransmission across various vertebrate Species

Orsolya Kántor¹, Alexandra Varga¹, Tamás Kovács-Öller^{2,3}, Anna Énzsöly^{4,5}, Lajos Balogh⁶, László Négyessy^{7,1}, Béla Völgyi^{2,3}, Ákos Lukáts⁵

¹*Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary*

²*Department of Experimental Zoology and Neurobiology, University of Pécs, Pécs, Hungary*

³*János Szentágothai Research Center, Pécs, Hungary*

⁴*Department of Ophthalmology, Semmelweis University, Budapest, Hungary*

⁵*Department of Human Morphology and Developmental Biology, Semmelweis University, Budapest, Hungary*

⁶*National „F. J. C.” Research Institute for Radiobiology and Radiohygiene, Budapest, Hungary*

⁷*Department of Theory, Institute for Particle and Nuclear Physics, Wigner Research Center for Physics, Hungarian Academy of Sciences, Budapest, Hungary*

P39. Terminations of different primary afferents on the hypoglossal motoneurons in the frog, *Rana esculenta*

Szilvia Kecskés, Klara Matesz, Andras Birinyi

Department of Anatomy, Histology and Embryology, University of Debrecen, MHSC, Debrecen, Hungary

P40. Activity and thermoregulatory changes in a new substrain of rats

Kekesi G., Petrovszki Z., Benedek G., Keri S., Horvath G.

Department of Physiology, Faculty of Medicine, University of Szeged, Szeged, Hungary

P41. PACAP enhances muscle contraction at an excitatory synapse of the snail

¹N. Krajcs, ¹L. Hernádi, ^{1,2}Z. Pirger, ²D. Reglödi, ¹Kiss, T

¹*Chemical Ecology and Neurobiology Research Group, Department of Experimental Zoology, Balaton Limnological Institute, Centre for Ecological Research, Hungarian Academy of Sciences, Tihany, Hungary,* ²PTE-MTA “Momentum” PACAP Team, University of Pécs, Pécs, Hungary

P42. Temporal frequency tuning and response phase of blue-ON cells in the lateral geniculate nucleus of the cat

Kóbor, P., Petykó, Z., Buzás, P.

Institute of Physiology, Medical School, University of Pécs, Pécs, Hungary

P43. Motoneuron survival and elongative axonal growth induced by spatiotemporally restricted ex vivo BDNF/GDNF gene therapy

Gábor Márton¹, Gholam Pajenda², David Hercher³, Georg Feichtinger³, Heinz Redl³, Antal Nógrádi^{1,3}

¹ *Department of Anatomy, Histology and Embryology, Faculty of Medicine, University of Szeged, Szeged, Hungary*

² *Ludwig Boltzmann Institute for Experimental and Clinical Traumatology, Department of Trauma Surgery, Medical University of Vienna; Vienna, Austria*

³ *Austrian Cluster for Tissue Regeneration, Ludwig Boltzmann Institute for Experimental and Clinical Traumatology, Vienna, Austria*

P44. Functional restoration after spinal cord injury from a new aspect: synchronous analyses of footprint pattern and limb motion

Gábor Márton¹, Zoltán Fekécs¹, László Gál¹, Dénes Török¹, Sándor Pintér², Antal Nógrádi¹

¹ *Department of Anatomy, Histology and Embryology, Faculty of Medicine, University of Szeged, Szeged, Hungary*

² *Department of Traumatology, Albert Szent-Györgyi Clinical Centre, University of Szeged, Szeged, Hungary*

P45. Movement related cortical potentials on corticography

Tamás Molnár^{1,3}, Eröss Loránd², Daniel Fabó³

¹ *Faculty of Information Technology and Bionics, Pázmány Péter Catholic University, Budapest, Hungary*

² *Dept. of Funct. Neurosurgery, National Institute for Clinical Neurosciences, Budapest, Hungary*

³ *Epilepsy Centrum, Dept. of Neurology, National Institute of Clinical Neurosciences, Budapest, Hungary*

P46. Effects of tachykinin receptor activation on prefrontal cortex neuronal activity

¹Hallapy, J., ¹Copploe, J., ¹Jacobowitz S., ^{1,2}Jalics, J., ¹Womble, M.,

¹ *Youngstown State University, Youngstown, OH, USA*

² *Wigner Research Center for Physics of the Hungarian Academy of Sciences, Budapest, Hungary*

P47. Neuronal responses to stationary and dynamic visual stimuli of the caudate nucleus in behaving cat.

Tamas Nagypal¹, Peter Gombkoto², Robert Averkin³, Tamas Puskas¹, Antal Berenyi¹, Gyorgy Benedek¹, Attila Nagy¹

¹ *Department of Physiology, University of Szeged, Szeged, Hungary*

² *Center for Molecular and Behavioral Neuroscience, Rutgers University, Newark, NJ, USA*

³ *Research Group for Cortical Microcircuits of the Hungarian Academy of Sciences, Department of Physiology, Anatomy and Neuroscience, University of Szeged, Szeged, Hungary*

P48. Areal and laminar distribution of Interneurons targeted by somatosensory cortical Afferents in the non-human Primate Samiri sciureus

Emese Pálfi^{1,2}, Orsolya Kántor², Mária Ashaber^{1,2}, Anna W. Roe³, Robert M. Friedman³, Csaba Dávid^{5,6}, Roland Nitschke⁴, László Négyessy¹

¹ *Department of Theory, Institute for Particle and Nuclear Physics, Wigner Research Centre for Physics, Hungarian Academy of Sciences, Budapest, Hungary*

² *Department of Anatomy, Histology and Embryology, Semmelweis University Medical School, Budapest, Hungary*

³ *Department of Psychology, Vanderbilt University, Nashville, USA*

⁴ *Life Imaging Center, Center for Biological Systems*

Analysis (ZBSA), Albert-Ludwigs-University, Freiburg, Germany

⁵ *Laboratory of Thalamus Research, Institute of Experimental Medicine Hungarian Academy of Sciences, Budapest, Hungary*

P49. Effect of an AMPA receptor antagonist, Talampanel, on the calcium level of the motor nerve terminals of G93A SOD1 mutant mice

Patai, Roland¹, Tortarolo, Massimo², Bendotti, Caterina², Paizs, Melinda¹, Siklós, László¹

¹*Institute of Biophysics, Biological Research Centre, Szeged, Hungary*

²*Department of Neuroscience, 'Mario Negri' Institute of Pharmacology, Milan, Italy*

P50. Response Characteristics of the Striatal Neurons to Visual Motion in Freely Moving Rats

Tamás Puskás^{1,2*}, Anett Nagy^{1,2}, Antal Berényi^{1,2,3}

¹*Department of Physiology, University of Szeged, Szeged, Hungary*

²*MTA-SZTE "Momentum" Oscillatory Neuronal Networks Research Group, Department of Physiology, University of Szeged, Szeged, Hungary*

³*Neuroscience Institute, New York University, School of Medicine, New York, NY, USA*

P51. The investigation of visual categorization with low and high spatial frequency modified pictures

Adrienn Aranka Rokszin¹, Gábor Csifcsák²

¹*Graduate School of Educational Sciences, University of Szeged, Szeged, Hungary*

²*Institute of Psychology, University of Szeged, Szeged, Hungary*

P52. Effect of chronic restraint stress on nociception and behaviour in mice

Bálint Scheich^{1,2}, Patricia Vincze^{1,2}, Valéria Tékus^{1,2}, Balázs Gaszner³, Erika Pintér^{1,2}, Zsuzsanna Helyes^{1,2}

¹*Department of Pharmacology and Pharmacotherapy, Faculty of Medicine, University of Pécs; Pécs; Hungary,* ²*János Szentágotthai Research Centre, University of Pécs; Pécs; Hungary,* ³*Department of Anatomy, Faculty of Medicine, University of Pécs; Pécs; Hungary*

P53. Sinusoidal signal propagation in layer II/III pyramidal neurons of the somatosensory cortex in wild type and Alzheimer disease related transgenic (Tg2576) mice

Attila Somogyi, Zoltán Katonai, Ervin Wolf*

Department of Anatomy, Histology and Embryology, University of Debrecen, Debrecen, Hungary

P54. Distinct Patterns of Synaptic Integration in the Dendrites of Tonic Spinal Lamina I and Lateral Spinal Nucleus Neurons

Mafalda Sousa^{1,2}, Zsófia Antal³, Eduardo Conde-Sousa⁴, Paulo Aguiar^{1,4}, Peter Szucs^{1,5}

¹*Instituto de Biologia Molecular e Celular, Porto, Portugal*

²*Departamento de Biologia Experimental, FMUP, Porto, Portugal*

⁴ Department of Anatomy, Hokkaido University School of Medicine, Sapporo 060-8638, Japan

BEHAVIOR AND COGNITION

P57. Differential involvement of fast spiking cell populations to distinct stages of sleep spindles in unanaesthetized, freely moving rats.

Robert G. Averkin, Viktor Szemenyei, Gábor Tamás

Research Group for Cortical Microcircuits of the Hungarian Academy of Sciences, Department of Physiology, Anatomy and Neuroscience, University of Szeged, Szeged, Hungary

P58. Caloric-Restriction and the Hippocampus: Ultrastructural Link Between Food-Intake and Synaptic Architecture

Réka Babits, Péter Sótónyi, Bence Rác

Dept. Anatomy, Fac. Vet. Sci., St. István University; Budapest; Hungary

P59. Optogenetic stimulation of the median and dorsal raphe: effects on social behavior

Diána Balázsfi, Livia Farkas, Ibolya Till, István Barna, Dr. Dóra Zelena, Csaba Cserép, Virág Takács, Dr. Viktor Varga, Dr. Gábor Nyíri, Dr. József Haller

Institute of Experimental Medicine, Hungarian Academy of Sciences; Budapest, Hungary

P60. Cognitive Enhancement Through Stabilization of the Hippocampal Network: The Role of Alpha7 Nicotinic Receptor Mediated Mechanisms as Indexed with *in vivo* Extracellular Electrophysiology

Zsolt K. Bali¹, Dénes Budai², Judit Inkeller¹, Roland Csurgók¹, Nóra Bruszt¹, Hajnalka Horváth¹, István Hernádi^{1*}

¹Department of Experimental Zoology and Neurobiology, and Szentágothai Research Center, University of Pécs; ²Kation Scientific Ltd., Minneapolis, MN, USA

P61. The role of arginine vasopressin in the regulation of impulsive behavior in virgin and lactating Brattleboro rats
Zoltan Balogh, Mano Aliczki, Dora Zelena, Anna Fodor, Jozsef Haller

Department of Behavioural Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary

P62. Structural and functional alterations of the prefrontal cortex in post-weaning social isolation induced abnormal aggression

László Biró, Eszter Sipos, Máté Tóth, Éva Mikics, Tamás Szabó, Bruzsik Bíborka, László Szenté, József Haller

Department of Behavioral Neuroscience, Institute of Experimental Medicine

P63. Hemokinin-1 plays an important role in anxiety and depression-like behaviours of mice

Éva Borbély^{1,2}, Zsófia Hajna^{1,2}, Valéria Tékus^{1,2}, Liza Nabi³, Alexandra Berger⁴, John P. Quinn⁵, Christopher J. Paige⁴, Julie Keeble³, János Szolcsányi¹, Erika Pintér^{1,2}, Zsuzsanna Helyes^{1,2}

¹*Department of Pharmacology and Pharmacotherapy, Faculty of Medicine, University of Pécs, Pécs, Hungary;*

²*János Szentágothai Research Center, University of Pécs, Pécs, Hungary;*

³*King's College London, Institute of Pharmaceutical Science, London, UK*

⁴*Ontario Cancer Institute, University Health Network, Toronto, Canada*

⁵*Department of Molecular and Clinical Pharmacology, Institute of Translational Medicine Liverpool University, Liverpool, UK*

P64. Juxtacellular recording and labelling of prefrontal interneurons during a rule switching task in freely moving rats.

Zsolt Borhegyi, Hugo Malagon-Viña, Michael Lagler, Thomas Klausberger

Dept. Cognitive Neurobiology, Center for Brain Research, Med. Univ. Vienna, Vienna, Austria

P65. Maternal motivation and lactation are influenced by thalamic tuberoinfundibular peptide 39

Melinda Cservenák^{1,2}, Éva R. Szabó^{1,2}, Ibolya Bodnár⁴, András Lékó¹, Miklós Palkovits^{1,3}, György M. Nagy⁴, Ted B. Usdin⁵, Arpád Dobolyi^{1,2}

¹*Laboratory of Neuromorphology, Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary,* ²*Laboratory of Molecular and Systems Neurobiology, Institute of Biology, Hungarian Academy of Sciences and Eötvös University, Budapest, Hungary,* ³*Human Brain Tissue Bank, Semmelweis University and the Hungarian Academy of Sciences, Budapest, Hungary,* ⁴*Laboratory of Neuroendocrinology, Department of Human Morphology and Developmental Biology, Semmelweis University, Budapest, Hungary,* ⁵*Section on Fundamental Neuroscience, National Institute of Mental Health, Bethesda, Maryland, USA*

P66. Feeding and metabolic consequences of IL-1 β microinjection into the cingulate cortex in the rat

Bettina Csetényi, Edina Hormay, Bernadett Nagy, István Szabó, Márk Bajnok Góré, Barnabás Hideg, Zoltán Karádi
Institute of Physiology, Medical School, University of Pécs, Pécs, Hungary

P67. The role of vasopressin released from the paraventricular nucleus of hypothalamus in stress-related behavior: studies in Brattleboro rats

Péter Csikota¹, Anna Fodor^{1,2}, Diána Balázsfi^{1,2}, Ottó Pintér¹, Mario Engelmann³, Dóra Zelena¹

¹ Hungarian Academy of Sciences, Institute of Experimental Medicine, Budapest, Hungary

² János Szentágothai School of Neurosciences, Semmelweis University, Budapest, Hungary

³ Otto-von-Guericke-Universität, Magdeburg, Germany

P68. Fate of Neurons in various Stages of Neurogenesis after Trauma

Kornél Demeter, József Haller

Department of Behavioural Neurobiology, Institute of Experimental Medicine of Hungarian Academy of Sciences; Budapest; Hungary

P69. Examination of the Role of Reward in Consumption of Highly Palatable Food in Intrauterin Underfed Rats

Máté Durst, Katalin Könczöl, Miklós Palkovits, Zsuzsanna E Tóth, Neuromorphological Laboratory, Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary

P70. Organisation of high frequency oscillation in the human brain

Daniel Fabó¹, István Ulbert^{2,3}, Sydney Cash⁴

¹ Epilepsy Centrum, Dept. of Neurology, National Institute of Clinical Neurosciences, Budapest, Hungary

² Pázmány Péter Catholic University, Faculty of Information Technology and Bionics, Budapest, Hungary

³ Dept. of Comparative Psychophysiology, Inst. for Psychology, Hungarian Academy of Sciences, Budapest, Hungary

⁴ Epilepsy Centrum, Massachusetts General Hospital, Boston, USA

P71. Sleep spindles are modulated by network state

Lejla Faradz-zade¹, László Acsády¹ and Péter Barthó¹

¹ Laboratory of Thalamus Research, Institute of Experimental Medicine, Hungarian Academy of Sciences, Hungary

P72. Effects of chronically injected neuroprotective compound on spatial memory and hippocampal dendritic spine density in APP/PS1 transgenic mice

Szabina Furdan, Emőke Borbély, János Horváth, Botond Penke, Livia Fülöp

University of Szeged Faculty of Medicine Department of Medical Chemistry
Szeged, Hungary

P73. Nootropics Prevent the Effect of Scopolamine in an phMRI Provocation Model

Nikolett Hegedűs, Pál Kocsis, Dávid Gajári, Szabolcs Dávid, Levente Deli, Zsófia Pozsgay, Károly Tihanyi
Preclinical Imaging Center, Gedeon Richter Plc. Budapest, Hungary

P74. Streptozotocin microinjection into the cingulate cortex alters glucose tolerance in the rat

Edina Hormay, Bettina Csetényi, István Szabó, Bernadett Nagy, Barnabás Hideg, Márk Bajnok Góré and Zoltán Karádi
Pécs University, Medical School, Institute of Physiology, Pécs, Hungary

P75. Cognitive enhancer effects of an alpha7 nicotinic receptor agonist (PHA-543613) in pharmacologically induced transient amnesia models in the rat

Judit Inkeller, Zolt Kristóf Bali, Roland Csurgyók, Nóra Bruszt, Hajnalka Horváth and István Hernádi.

Department of Experimental Zoology and Neurobiology, and Szentágothai Research Centre, University of Pécs, Hungary

P76. Does intra-amygdaloid oxytocin have a pro-social effect in rhesus macaques?

K. László^{1,2}, L. Dieckman¹, P.E. Zimmerman¹, K.M. Gothard¹

¹*Department of Physiology, The University of Arizona, College of Medicine, Tucson, AZ, USA*

²*Institute of Physiology, Pécs University Medical School, Pécs, Hungary*

P77. The MAM-E17 rat model of schizophrenia: Behavioral examinations

Veronika Kállai^{1,2}, Rita Gálosi¹, Attila Tóth¹, Zoltán Petykó¹, Tamás Ollmann¹, László Péczely¹, Anita Kovács¹, János Kállai², Imre Szabó², László Lénárd¹

¹*Institute of Physiology and* ²*Department of Behavioral Sciences, School of Medicine, University of Pécs, Pécs, Hungary*

P78. Simultaneous Electrophysiology and Ca-imaging of human cortical synchronous population activity *in vitro*

*B. P. Kerekes^{1,2}, A. Kaszás³, K. Tóth³, B. Chiovini³, G. Szalay³, D. Pálffy³, K. Spitzer³, I. Ulbert^{2,1}, L. Wittner², B. Rózsa³;

¹*Pázmány Péter Katolikus Egyetem Információs Technológiai Kar, Budapest, Hungary;*

³*Hungarian Acad. of Sci. Inst. of Exptl. Med., Budapest, Hungary*

P79. Conductance measurements of electrical fields generated by transcranial electrical stimulation (TES) in human cadavers

Árpád Kormányos^{1*}, Mihály Vöröslakos¹, Kitti Brinyiczki², Tamás Puskás^{1,3}, Béla Iványi², György Buzsáki⁴, Antal Berényi^{1,3,4}

¹*Department of Physiology, University of Szeged, Szeged, Hungary*

²*Department of Pathology, University of Szeged, Szeged, Hungary* ³*MTA-SZTE “Momentum” Oscillatory Neuronal Networks Research Group, Department of Physiology, University of Szeged, Szeged,* ⁴*Hungary Neuroscience Institute, New York University, School of Medicine, New York, NY, USA*

P80. Application of the three hit theory in PACAP heterozygote mice: Maternal separation and chronic stress influence BNST CRF and cPEW Ucn1 in an inverse manner

L. Kovács¹, J. Farkas¹, G. Bodnár¹, T. Gaszner¹, L. Gaspar¹, A. Balogh², B. Szalontai³, V. Kormos⁴; B. Gaszner¹

¹*Dept. of Anatomy,* ²*Dept. of Biol.,* ³*Plant Biol. Res. Group,* ⁴*Dept. of Pharmacology and Pharmacotherapy, Pécs University, Pécs, Hungary*

P81. Effects of intraamygdaloid microinjections of RFRP peptides on passive avoidance learning in rats

Anita Kovács¹, Kristóf László¹, Olga Zagoracz¹, Tamás Ollmann¹, László Péczely¹, László Lénárd^{1,2}

¹*Institute of Physiology, Pécs University Medical School, Pécs, Hungary*

²*Molecular Neurophysiology Research Group, Pécs University, Szentágothai Center, Pécs, Hungary*

P82. Cholinergic basal forebrain structures are not essential for the mediation of the arousing action of glutamate

Z. Lelkes¹, T. Porkka-Heiskanen²

¹*Dept. of Physiology, University of Szeged, Szeged, Hungary,* ²*Dept. of Physiology, Institute of Biomedicine, University of Helsinki, Helsinki, Finland*

P83. Brain serotonergic mechanisms underlying abnormal aggression resulting from early social adversities

Éva Mikics, Eszter Sipos, Christina Miskolczi, Szilamér Ferenczi, László Biró, Áron Tulogdi, Beáta Barsvári, József Haller
Department of Behavioral Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary

P84. Abnormal aggression induced by early-life social adversity with a focus on acute and long-term epigenetic regulation in the medial amygdala and the medial prefrontal cortex.

Christina Miskolczi, Eszter Sipos, Szilamer Ferenczi, Laszlo Biro, Jozsef Haller, Eva Mikics
Institute of Experimental Medicine Hungarian Academy of Sciences, Budapest, Hungary

P85. Metabolic Effects of Local Microinjection of Streptozotocin into the Mediodorsal Prefrontal Cortex

Bernadett Nagy, István Szabó, Bettina Csetényi, Edina Hormay, Márk Bajnok Góré and Zoltán Karádi
Institute of Physiology, Pécs University, Medical School, Pécs, Hungary

P86. The Effect of Different Hypoxic/Ischemic Stress Models on the Cortical Microcirculation – a Laser Speckle Imaging Study in Piglets.

János Németh, Dániel Zölei-Szénási, Orsolya Oláh, Valéria Tóth-Szűki, Ferenc Bari, Tomi Smausz, Ferenc Domoki

P87. Effects of neurotensin microinjection in the ventral pallidum on anxiety

Tamás Ollmann¹, Eszter Berente¹, László Péczely¹, Kristóf László¹, Anita Kovács¹, Rita Gálosi¹, Zoltán Karádi^{1, 2}, László Lénárd^{1, 2}

¹ *Institute of Physiology, Pécs University, Medical School*

² *Molecular Neurophysiology Research Group, Pécs University, Szentágotthai Research Center, Pécs, Hungary*

P88. The role of D2 dopamine receptors of the ventral pallidum in motivational and learning processes

László Péczely¹, Ádám Szabó¹, Tamás Ollmann¹, Kristóf László¹, Anita Kovács¹, Rita Gálosi¹, Zoltán Karádi^{1, 2}, László Lénárd^{1, 2}

¹*Institute of Physiology, Pécs University, Medical School*

²*Molecular Neurophysiology Research Group, Pécs University, Szentágotthai Research Center, Pécs, Hungary*

P89. Region-specific adenosinergic modulation of the slow cortical rhythm in urethane-anesthetized rats

Máté Pethő, László Détári, Attila Tóth
Department of Physiology and Neurobiology, Institute of Biology, Eötvös Loránd University, Budapest, Hungary

P90. An Ascending Inhibitory Pathway from the Brainstem Synchronizes Thalamocortical Activity

Plattner V. M.¹, Diana M. A.², Giber K.¹, Bokor H.¹, Dieudonne S.² & Acsady L.¹

¹*Institute of Experimental Medicine, Budapest, Hungary*

²*École Normale Supérieure, Paris, France*

P91. Expression of primary ciliary markers in satiety centers of the brain

Éva Sipos, Sámuel Komoly, Péter Ács
Department of Neurology, Medical School of Pécs, University of Pécs, Hungary

P92. Circadian and homeostatic regulation of slow wave activity under ultra-short light-dark conditions in rats

Örs Szalontai, Tünde Hajnik, Attila Tóth, László Détári

ELTE Department of Physiology and Neurobiology, Budapest, Hungary

P93. Application of fear conditioning and fear extinction assay on anxious (Ax) and non-anxious (nAx) mice

Ágnes Szántai¹, Emőke Borbély², Géza Müller³, Livia Fülöp², Viktor Szegedi¹

¹ *Biological Research Center of the Hungarian Academic of Sciences, Szeged, Hungary*

² *Department of Medical Chemistry, University of Szeged, Szeged, Hungary*

³ *No academic affiliation*

P94. Gut microbiota determines the level of anxiety in two inbred mouse strains

Viktor Szegedi¹, János Horváth², Ildikó Eszik¹, Dezső Virók³, Livia Fülöp³, Zoltán Bihari⁴, Géza Müller⁵

¹ *Biological Research Center, Hungarian Academy of Sciences, Szeged, Hungary*

² *Department of Medical Chemistry, University of Szeged, Szeged, Hungary*

³ *Institute of Clinical Microbiology, University of Szeged, Szeged, Hungary*

⁴ *Department of Metagenomics, Institute for Biotechnology, Bay Zoltán Nonprofit Ltd. for Applied Research, Szeged, Hungary*

NEUROENDOCRINOLOGY

P120. The effect of urocortin I on the hypothalamic ACTH secretagogues

Zsolt Bagosi¹, Krisztina Csabafi¹, Miklós Palotai¹, Miklós Jászberényi¹, Imre Földesi², János Gardi², Gyula Szabó¹, Gyula Telegdy^{1,3}

¹*Department of Pathophysiology, Faculty of Medicine, University of Szeged, Hungary*

²*Department of Endocrinology, Faculty of Medicine, University of Szeged, Hungary*

³*Neuroscience Research Group of the Hungarian Academy of Sciences, Szeged, Hungary*

P121. Age-related central leptin-resistance in different nutritional states

Márta Balaskó, Péter Nagy, Ildikó Rostás, Judit Tenk, Szilvia Soós, Miklós Székely, Erika Pétervári

Department of Pathophysiology and Gerontology, University of Pécs, Pécs, Hungary

P122. Characterization of the thermoregulatory response to pituitary adenylate cyclase-activating polypeptide

Banki E¹, Reglodi D¹, Pakai E², Zsiborás Cs², Czett A¹, Parkash P², Tamas A¹, Hashimoto H³, Toth G⁴, Garami A²

¹*Department of Anatomy, PTE-MTA „Lendület” PACAP Research Team, Medical School, University of Pécs, Hungary* ²*Department of Pathophysiology and Gerontology, Medical School, University of Pécs, Hungary,* ³*Graduate School of Pharmacological Sciences, Osaka University, Osaka, Japan* ⁴*Department of Medical Chemistry, University of Szeged, Hungary*

P123. Changes of lysyl-oxidase expression in myenteric ganglia in different gut segments of streptozotocin-induced untreated and insulin-treated diabetic rats

N Bódi¹, Zs Jancsó², Zs Giricz¹, A Pál¹, P Talapka¹, M Poles¹, M Bagyánszki¹, E Hermes², É Fekete¹

¹*Department of Physiology, Anatomy and Neuroscience,*

²*Department of Biochemistry and Molecular Biology, Faculty of Science and Informatics, University of Szeged, Szeged, Hungary*

P124. Molecular Requirements of Ubiquitination Mediated Regulation of Thyroid Hormone Activation via Type 2 Deiodinase

Péter Egri¹ and Balázs Gereben¹

¹*Laboratory of Molecular Cell Metabolism, Institute of Experimental Medicine, Hungarian Academy of Sciences; Budapest; Hungary*

P125. Effect of Endocrine Disruptor Compound Zearalenone on Hypothalamic Neuropeptide Gene Expression

Szilámér Ferenczi¹, Rókus Kriszt^{1,3}, Zsuzsanna Szőke², Árpád Czéh², Krisztina J. Kovács¹

¹*Laboratory of Molecular Neuroendocrinology, Institute of Experimental Medicine, Budapest, Hungary*

²*Soft Flow Hungary R&D Ltd. Pécs, Hungary*

³*Semmelweis University, Budapest, Hungary*

P126. Melanocortin system in the regulation of energy homeostasis in SHR rats

Nóra Füredi¹, Bianka Aubrecht¹, Alexandra Mikó¹, Balázs Gaszner², Erika Pétervári¹

¹*Department of Pathophysiology and Gerontology, University of Pécs, Hungary*

²*Department of Anatomy, University of Pécs, Pécs, Hungary*

P127. Investigation of nesfatin-1 action on thermoregulation

Katalin Könczöl¹, Máté Durst¹, Szilámér Ferenczi², Miklós Palkovits¹, Dóra Zelena², Krisztina Kovács², Zsuzsanna E. Tóth¹

¹*Neuromorphological Laboratory, Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary;* ²*Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

P128. Effects of alarin on the thermoregulation of rats

Alexandra Mikó¹, Péter Balla¹, Nóra Füredi¹, Márta Balaskó¹, Susanne Brunner², Barbara Kofler², Erika Pétervári¹

¹*Department of Pathophysiology and Gerontology, Medical School, University of Pécs, Hungary*

²*Laura Bassi Centre of Expertise – THERAPEP, Research Program for Receptor Biochemistry and Tumor Metabolism, Department of Pediatrics, Paracelsus Medical University, Salzburg, Austria*

P129. Interleukin-1 β (187-207)-induced hyperthermia is inhibited by interleukin-1 β (193-195) in rats

Miklós Palotai¹, Edina Kiss¹, Zsolt Bagosi¹, Miklós Jászberényi¹, Gábor Tóth², Györgyi Váradi², Gyula Telegdy^{1,3}

¹*Department of Pathophysiology, Faculty of Medicine, University of Szeged, Hungary*

²*Department of Medical Chemistry, Faculty of Medicine, University*

of Szeged, Hungary

³Neuroscience Research Group of the Hungarian Academy of Sciences, Szeged, Hungary

P130. Reversal of age related learning deficiency by the vertebrate pituitary adenylate cyclase activating polypeptide (PACAP) in *Lymnaea*

^{1,3}Pirger Z., ²Naskar S., ²Kemenes G., ³Reglodi D., ²Kemenes I.

¹Chemical Ecology and Neurobiology Research Group, Department of Experimental Zoology, Balaton Limnological Institute, Centre for Ecological Research, Hungarian Academy of Sciences, Tihany, Hungary

²School of Life Sciences, University of Sussex, Falmer, Brighton, United Kingdom

³PTE-MTA “Momentum” PACAP Team, University of Pecs, Pecs, Hungary

P131. The Fractalkine/Cx3CR1 System is Implicated in the Development of Metabolic Visceral Adipose Tissue Inflammation in Obesity

*Ágnes Polyák, Szilamér Ferenczi, Zsuzsanna Winkler, Ádám Dénes, Rókus Kriszt, Bernadett Pintér-Kübler and Krisztina J. Kovács
Laboratory of Molecular Neuroendocrinology Institute of Experimental Medicine, Budapest, Hungary*

P132. The mechanisms of induction of amylin in the maternal preoptic area

Éva R. Szabó¹, Melinda Cservedák¹, Árpád Dobolyi¹

¹Neuromorphological Laboratory, Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary

P133. 3-D reconstruction of the distribution of melanin-concentrating hormone producing neurons in the mouse hypothalamus.

Reinitz L, Szőke B, Gerics B, Sótonyi P, Jancsik V.

Department of Anatomy and Histology; Faculty of Veterinary Science Szent István University; Budapest; Hungary

P134. Central catabolic effects of leptin during the course of aging

Ildikó Rostás, Péter Novinszky, Judit Tenk, Szilvia Soós, Miklós Székely, Erika Pétervári, Márta Balaskó

Department of Pathophysiology and Gerontology, University of Pécs, Pécs, Hungary

P135. Impact of ovarian hormone deficiency and subsequent treatments with estrogen receptor agonists on the innate immune system of the hippocampus in middle-aged female rats

Miklós Sárvári¹, Imre Kalló^{1,2}, Erik Hrabovszky¹, Norbert Solymosi³, Zsolt Liposits^{1,2}

¹Laboratory of Endocrine Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary

²Faculty of Information Technology, Pázmány Péter Catholic University, Budapest

³Faculty of Veterinary Science, Szent István University, Budapest

P136. Colocalization of cocaine and amphetamine regulated transcript with kisspeptin and neurokinin B in the human infundibular region

Katalin Skrapits¹, Beáta Á. Borsay², László Herczeg², Philippe Ciofi³, Stephen R. Bloom⁴, Mohammad A. Ghatei⁴, Waljit S. Dhillo⁴, Zsolt Liposits^{1,5} and Erik Hrabovszky¹

¹*Laboratory of Endocrine Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary;*

²*Department of Forensic Medicine, Faculty of Medicine of the University of Debrecen, Debrecen, Hungary;*

³*INSERM U862, Neurocentre Magendie, Bordeaux, France;*

⁴*Department of Investigative Medicine, Hammersmith Hospital, Imperial College London, London, United Kingdom;*

⁵*Department of Neuroscience, Faculty of Information Technology, Pázmány Péter Catholic University, Budapest, Hungary*

P137. Age-associated alterations in the acute central effects of corticotropin-releasing factor (CRF) on energy balance
Judit Tenk, Tamás Rimai, Eszter Varga, Ildikó Rostás, Szilvia Soós, Miklós Székely, Márta Balaskó
Department of Pathophysiology and Gerontology, Medical School, University of Pecs, Pecs Hungary

P138. Differential Gene Expression in the Male and Female GnRH Neurons
Csaba Vastagh¹, Imre Farkas¹, Norbert Solymosi², Miklós Sárvári¹, Zsolt Liposits¹
¹*Department of Endocrine Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*
²*Faculty of Veterinary Science, Szent István University, Budapest, Hungary*

P139. Neuronal connections of the central amygdaloid nucleus with refeeding-activated brain areas

Barbara Vida¹, Györgyi Zséli¹, Ronald M. Lechan^{2,3}, Csaba Fekete^{1, 2}

¹*Department of Endocrine Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

²*Department of Medicine, Division of Endocrinology, Diabetes and Metabolism, Tupper Research Institute, Tufts Medical Center, Boston, MA, USA*

³*Department of Neuroscience, Tufts University School of Medicine, Boston, MA, USA*

P140. Association of afferent and efferent connections of the parabrachial nucleus (PBN) with refeeding-activated brain areas
G. Zséli¹, B. Vida¹, R. M. Lechan^{2,3}, *C. Fekete^{1,2};
¹*Dept. of Endocrine Neurobio., Inst. of Exptl. Medicine, Hungarian Acad. of Sci., Budapest, Hungary*
²*Div. of Endocrinol., Tufts Med. Ctr., Boston, MA*
³*Dept. of Neurosci., Tufts Univ. Sch. of Med., Boston, MA*

P141. Mitochondrial metabolic lateralization in the rat hypothalamus.
Kiss Dávid Sándor, Tóth István, Jócsák Gergely, Bartha Tibor, Frenyó V. László, Attila Zsarnovszky
Szent István University Faculty of Veterinary Sciences, Budapest, Hungary

P142. Effects of estrogen, thyroid hormones and Bisphenol A on the regulation of estrogen- and thyroid hormone receptor expression in the developing cerebellum.
Tóth István, Kiss Dávid Sándor, Jócsák Gergely, Bartha Tibor, Frenyó V. László, Attila Zsarnovszky
Szent István University Faculty of Veterinary Sciences, Budapest, Hungary

P142a Low Concentration of 17 β -Estradiol Decreases Frequency of Postsynaptic Currents in GnRH Neurons of Metestrous Mice via Endocannabinoid Signaling

Flóra Bálint¹, Imre Farkas¹, Zsolt Liposits^{1,2}

¹Laboratory of Endocrine Neurobiology, Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary

²Department of Neuroscience, Faculty of Information Technology, Pázmány Péter Catholic University, Budapest, Hungary

DEVELOPMENTAL NEUROBIOLOGY

P143. Localization of glutamine-synthase positive cells in the developing subventricular zone

¹Adorján István, ¹Kálmán Mihály

¹Department of Anatomy, Histology and Embryology Semmelweis University Budapest, Hungary

P144. Development of GABA-erg neurons in the mouse superficial dorsal horn

Anita Balázs, Zoltán Mészár, Klaudia Dócs, Zoltán Hegyi, Miklós Antal

Department of Anatomy, Histology and Embryology, Medical and Health Science Center, University of Debrecen, Debrecen, Hungary

P145. Organization of extracellular matrix in the brainstem of chicken embryo

András Birinyi, Botond Gaál, Éva Rácz, Szilvia Kecskés, Klára Matesz

Department of Anatomy, Histology and Embryology, University of Debrecen, MHSC, Debrecen, Hungary

P146. Apoptotic effects of the 'designer drug' methylenedioxypropylamphetamine (MDPV) on the neonatal mouse brain

László Gerecsei, Nikolett Lepesi, András Csillag, Ágota Ádám
Department of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary

P147. Migratory pathways and morphological maturation of neurons populating the superficial spinal dorsal horn

Mészár, Zoltán¹; Balázs, Anita¹; Murakami, Fujio²; Antal, Miklós¹

¹Department of Anatomy, Histology and Embryology, MDHSC, University of Debrecen, Debrecen, Hungary

²Laboratory of Neuroscience, Graduate School of Frontier Biosciences, Osaka University, Osaka, Japan

P147a. Morphological Consequences Of Intravitreal PACAP Injection In The Developing Rat Retina

Nyisztor Zs., Berta G., Gábor R., and Dénes V.

Department of Experimental Zoology and Neurobiology, University of Pécs, Pécs, Hungary

Department of Medical Biology, School of Medicine, University of Pécs, Pécs, Hungary

DISORDERS OF THE NERVOUS SYSTEM

P148. Myelination is impaired in the human hippocampal formation in Down syndrome

Ábrahám, H¹, Kravják, A², Seress, L¹

Central Electron Microscopic Laboratory¹ and Institute of Pathology² of Faculty of Medicine, University of Pécs, Pécs, Hungary

P149. Pituitary Adenylate Cyclase-Activating Polypeptide (PACAP) Prevents Monosodium Glutamate (MSG) Induced Functional Disturbances in the Mouse Retina

Atlasz T^{1,2}, Balogh M⁴, Werling D³, Zhang Y¹, Reglodi D³, Bloomfield S¹, Debertin G⁴, Volgyi B^{1,4}.

¹*Physiology & Neuroscience and Ophthalmology, New York University, New York, NY, USA;* ²*Dept of Sportbiology,* ³*Dept of Anatomy, MTA-PTE PACAP “Lendület” Research Team,* ⁴*Dept of Experimental Zoology and Neurobiology, University of Pecs, Pecs, Hungary*

P150. Grafted neuroectodermal stem cells rescue damaged rat retinal ganglion cells otherwise destined to die

Péter Balázs Kocsis¹, Zoltán Fekécs², Krisztián Pajer², Antal Nógrádi²

¹*Department of Ophthalmology, Albert Szent-Györgyi Clinical Centre, University of Szeged*

²*Department of Anatomy, Histology and Embryology, Faculty of Medicine, University of Szeged*

P151. The effects of nNOS inhibitor, N^w-propyl-L-arginine (L-NPA), pre-treatment on early latent period of epileptogenesis in a kainic acid mouse model of epilepsy.

E. Beamer., T. Thippeswamy., G. Sills

Institute of Ageing and Chronic Disease, University of Liverpool, Liverpool, UK

P152. Evoked high frequency oscillations in the human hippocampal formation

Virág Bokodi^{1,2}, Emilia Tóth¹, Zsófia Maglóczky², Entz László³, Loránd Erőss³, István Ulbert^{1,4}, Dániel Fabó⁵

¹ Pázmány Péter Catholic University, Faculty of Information Technology and Bionics, Budapest, Hungary

² *Dept. of Cellular and Network Neurobiology, Institute of Experimental Medicine, Budapest, Hungary*

³ *Dept. of Funct. Neurosurgery, National Institute for Clinical Neurosciences, Budapest, Hungary*

⁴ *Dept. of Comparative Psychophysiology, Inst. for Psychology, Hungarian Academy of Sciences, Budapest, Hungary*

⁵ *Epilepsy Centrum, Dept. of Neurology, National Institute of Clinical Neurosciences, Budapest, Hungary*

P153. Mycobacterium avium chronic infection induces alterations in the hippocampal cytokine

Daniela Calçada^{1,2}*, Susana Roque^{1,2}*, Carlos Branco, Bruno Rodrigues^{1,2}, Susana Monteiro^{1,2}, Nuno Sousa^{1,2}, Joana A. Palha^{1,2}, Margarida Correia-Neves^{1,2}

P186. Feasibility of dynamic stereovision tests in amblyopia screening

Zsófia Csizék¹, Diána Fülöp¹, Vanda Nemes¹, Anna Budai¹, Eszter Mikó-Baráth¹, Francesca D'Orlando², Grazia Caporusso², Tiziano Agostini², Gábor Jandó¹

¹*Institute of Physiology, Medical School, University of Pécs, Pécs, Hungary*

²*Department of Psychology, University of Trieste, Trieste, Italy*

P187. withdrawn

P188. FcRN transgenics as a novel method for generating superior CB₁ cannabinoid receptor antibodies

Gyula Y. Balla¹, Judit Cervenak², Barna Dudok¹, Christopher M. Henstridge¹, Eszter Szabadits¹, Szilárd I. Szabó¹, Marco Ledri¹, László Barna¹, Imre Kacs Kovics², István Katona¹

¹*Institute of Experimental Medicine, Hungarian Academy of Science, Budapest, Hungary*

²*ImmunoGenes Kft, Budakeszi, Hungary*

P189. An implantation method of Pt/Ir microwires for chronic neural recording from the orbitofrontal cortex of freely moving mice.

Horváth J.¹, Papp L.² Averkin R.G.³

¹*Department of Medical Chemistry, Faculty of Medicine, University of Szeged*

²*Neuronelektrod Ltd.*

³*Cortical Microcircuits Research Group of Hungarian Academy of Sciences, University of Szeged, Szeged, Hungary*

P190. Fast three-dimensional imaging of neuronal assemblies in the mouse visual cortex using genetically-encoded neuronal indicators and two-photon microscopy

Judák, L.^{1*}, Szalay, G.¹, Katona, G.¹, Maák, P.², Veress, M.², Kaszás, A.^{1,3}, Spitzer, K.¹, Chiovini, B.¹, Pálfi, D.^{1,3}, Hiller, D.⁴, Roska, B.⁴, Rózsa, B.^{1,3}

¹*Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

²*Department of Atomic Physics, Budapest University of Technology and Economics, Budapest, Hungary*

³*The Faculty of Information Technology, Pázmány Péter Catholic University, Budapest, Hungary*

⁴*Neural Circuit Laboratories, Friedrich Miescher Institute for Biomedical Research, Basel, Switzerland*

P191. Optrode for multimodal deep-brain optical stimulation
Marcell Kiss^{1*}, Zoltán Fekete¹

¹*MEMS Lab, Institute for Technical Physics & Material Science, RCNS, HAS Budapest, Hungary*

P192. A Novel Methodology for Identifying Low-Threshold Afferent Driven Inhibitory Neurons in the Spinal Dorsal Horn
Aron Koszeghy¹, Adrienn Kovacs¹, Andrea Palfi¹, Oszkar Erdei¹, Marta Bodnar¹, Peter Szucs¹

¹*Department of Physiology, UD MHSC, Debrecen, Hungary*

P193. Robust silicon-based microelectrode arrays and a microdrive system for in vivo electrophysiology
Gergely Márton, Péter Baracska, Richárd Fiáth, Zoltán Fekete, István Ulbert, Gábor Juhász, Anita Pongrácz
Institute for Technical Physics and Materials Science Research Centre for Natural Sciences, HAS, Budapest, Hungary

P194. Probing identified synapses at the nanoscale: developing software tools for visualization and analysis of correlated confocal- and STORM super-resolution microscopy
Vivien Miczán¹, Barna Dudok¹, László Barna¹, András Horváth², István Katona¹

¹*Institute of Experimental Medicine, Hungarian Academy of Sciences, Budapest, Hungary*

²*Faculty of Information Technology and Bionics, Pázmány Péter Catholic University, Budapest, Hungary*

P195. Imaging mass spectrometry of the brain of pacap deficient and wild-type mice

Rivnyak A¹, Maasz G^{2,3,4}, Reglodi D¹, Schmidt J^{2,3,4}, Pirger Zs^{1,5}, Mihalik A¹, Kiss P¹, Gaszner B¹, Tamas A¹, Hashimoto H⁶, Mark L^{2,3,4}

¹*Department of Anatomy, PTE-MTA „Lendulet” PACAP Research Team, University of Pecs*

²*Department of Analytical Biochemistry Institute of Biochemistry and Medical Chemistry University of Pecs*

³*Imaging Center for Life and Material Sciences, University of Pecs*

⁴*Janos Szentagothai Research Center, University of Pecs*

⁵*Chemical Ecology and Neurobiology, Department of Experimental Zoology, Balaton Limnological Institute, Centre for Ecological Research, Hungarian Academy of Sciences,*

⁶*Graduate School of Pharmacological Sciences, Osaka University, Osaka, Japan*

P196. Quantitative in vivo imaging in brain science

Mariann Semjéni¹, Noémi Kovács¹, Ildikó Horváth², Dániel S Veres², Krisztián Szigeti², Domokos Máthé¹

¹*CROmed Translational Research Centers, Budapest, Hungary*

²*Department of Biophysics and Radiation Biology, Semmelweis University, Budapest, Hungary*

P197. In vivo Multiphoton Microscopy of Gliovascular Reactions: a Preliminary Study

László Tóth, Katalin Kis-Petik¹, Mihály Kálmán, István Adorján
Dept. of Anatomy, Histology and Embryology, Semmelweis University, Budapest, Hungary

¹*Dept. of Biophysics and Radiation Biology, Semmelweis University, Budapest, Hungary*

P198. Body Doubles in the stage of PCR cloning: A general use of Type IIS Restriction Enzymes for cloning

Eszter Tóth¹, Petra Bencsura², Krisztina Huszár², Péter István Kulcsár¹, Barbara Vodicska¹, Antal Nyeste¹, Zsombor Welker², Szilvia Tóth², Ervin Welker^{1,2,*}

¹*Institute of Biochemistry, Biological Research Centre, Hungarian Academy of Sciences, Szeged, Hungary*

²*Institute of Molecular Pharmacology, Research Centre for Natural Sciences, Hungarian Academy of Sciences, Budapest, Hungary*

P199. Electrophysiological Correlates of Letter Spacing in Natural Reading

Béla Weiss¹, Balázs Knakker², Zoltán Vidnyánszky^{1,3}

¹*Neuroimaging Research Group, Research Centre for Natural Sciences, Hungarian Academy of Sciences, Budapest, Hungary*

²*Faculty of Information Technology and Bionics, Pázmány Péter Catholic University, Budapest, Hungary*

³*Department of Cognitive Science, Faculty of Natural Sciences, Budapest University of Technology and Economics, Budapest, Hungary*

P200. A Novel EEG Processing Framework for Analyses of Background and Event-Related Brain Activities Related to Senso-Motoric Processes

Béla Weiss¹, János Körmendi², Zoltán Nagy^{2,3,4}

¹*Neuroimaging Research Group, Research Centre for Natural Sciences, Hungarian Academy of Sciences, Budapest, Hungary*

²*National Institute of Clinical Neurosciences, Budapest, Hungary*

³*University of Pannonia, Veszprém, Hungary*

⁴*Department-Section of Vascular Neurology, Semmelweis University, Budapest, Hungary*

P200a. Analyzing dendritic spine movement in cultures: a fast and effective way to identify regulatory pathways influencing spine motility and maintenance

¹Tárnok K., ¹Gulyás M., ¹Bencsik N., ¹Ferenc K., ²Pfizenmaier K.,

²Hausser A., ¹Schlett K.

¹*Dept. Physiology and Neurobiology, Eötvös Loránd University, Budapest, Hungary*

²*Inst. Cell Biology and Immunology, University Stuttgart, Stuttgart, Germany*

P200b. Determination of cortical and synaptic layers and synaptic dynamics based on extracellular multi-electrode potential measurements

Zoltán Somogyvári^{1,3}, Zsigmond Benkő¹, Antal Berényi^{2,3,4}, Lisa Roux⁵, John Long⁵, György Buzsáki^{2,3,5}

¹*Wigner Research Centre for Physics, of the Hungarian Academy of Sciences, Department of Theory, Budapest, H-1121, Hungary*

²*The Neuroscience Institute New York University, School of Medicine, New York, NY 10016, USA*

³*Center for Molecular and Behavioral Neuroscience, Rutgers, The State University of New Jersey, Newark, NJ 07102*

⁴*MTA-SZTE 'Momentum' Oscillatory Neural Networks Research Group, University of Szeged, Department of Physiology, Szeged, H-6720, Hungary*

⁵*Howard Hughes Medical, Institute, Janelia Farm Research Campus, Ashburn, Virginia 20147, USA*

List of participants

Abbreviations:

PL: Plenary Lecture
S: Symposium
P: Poster

Ábrahám, H. P148
Ackert J. P164
Ács P. P91
Acsády L. P32, P71, P90
Adachi N. P161
Ádám Á. P146
Adam-Vizi V. P18.
Ádori C. P98
Adorján I. P143, P197
Agostini T. P31, P186.
Aliczki M. P61, P102e
Ambrus A. P18.
Andrási T. P103, P112
Antal M. P5, P8, P19, P27, P36, P144, P147
Antal Zs. P19, P54
Antoni F. P11, P156, P159
Ashaber M. P48.
Atlasz T. P149, P164, P181
Aubrecht B. P126
Averkin R. P47, P57, P189
Baba A. P28.

Babits R. P58.
Bagdy G. P98, P102i
Bagó A. P181b
Bagoly T. P12, P14, P176
Bagosi Zs. P120, 129
