Dear PHENIXians,

The success of PHENIX now and in the future critically depends on the hard work of the young people in the collaboration and we recognize their work in our monthly tradition. This month, we highlight the work of two young PHENIXians who spent a good amount of time in the counting house during Run16 and are already analyzing data, although at this point they don't yet have a Ph.D. thesis topic. We are looking forward to their beautiful theses results in the near future. These are Kurt Hill of University of Colorado, Boulder, and Daniel Kincses of Eotvos University, Budapest. The web pages (linked below) highlight their work, their backgrounds, and even some of their non-physics interests. We hope that this would help us learn more about our collaborators:

http://www.phenix.bnl.gov/WWW/pub/awards/html/hill_kurt.html

http://www.phenix.bnl.gov/WWW/pub/awards/html/kincses_daniel.html

The pages of all the PHENIXians that have been highlighted so far can be found here:

<http://www.phenix.bnl.gov/WWW/pub/awards/>

When you see Kurt and Daniel next, please join us in congratulating them on their hard work. Sincerely, Julia (on behalf of Yasuyuki and deputies)
