We are pleased to inform you that your manuscript

MANUSCRIPT NO.: TUFFC-07027-2015.R1

MANUSCRIPT TYPE: Papers

TITLE: Experimental Validation of a Convolution-Based Ultrasound Image Formation Model using a Planar Arrangement of Micrometer-Scale Scatterers

AUTHOR(S): Gyöngy, Miklós; Makra, Ákos

has been accepted for publication in the Transactions on Ultrasonics, Ferroelectrics, and Frequency Control. The publisher has been notified of this decision and all the files you have uploaded will be retrieved for journal production.

Please make sure you have submitted all necessary materials in accordance with the instructions in the "Information for Contributors" at <http://www.ieee-uffc.org/main/publications/tr/contrib.pdf>, including:

- * High-quality art work,
- * Scanned signed copyright form, downloaded from http://www.ieee.org/publications_standards/publications/rights/ieeecopyrightform.pdf, and
- * Recent photos and updated biosketches for all authors (for papers only).

If you have not properly uploaded any of the required files, please contact the publisher at shaunam@assoqh.org for further instructions. All communications with the publisher should include your manuscript number.

IMPORTANT: Only minor changes to your accepted manuscript, such as corrections for typos or English, are allowed. In case more significant corrections or changes are necessary, please submit your modified manuscript to me for review as early as possible with a clear indication where the changes are made so that I may grant final approval. Late changes may incur a heavy editorial cost and should therefore be avoided as much as possible.

You will receive the proof of your manuscript directly from the publisher via email.

Please refer to the policies regarding the voluntary page charges and mandatory page charges in the "Information for Contributors" at <http://www.ieee-uffc.org/main/publications/tr/contrib.pdf>. However, there is no charge for publishing front cover images.

If you have not already done so, you may still request that your article be published with unrestricted public access, as this is a hybrid journal allowing either traditional manuscript submission or Open Access (author-pays OA) manuscript submission. Open Access publishing for your paper would entail a commitment to pay the discounted US\$1,750 Open Access author publication charge in order to enable unrestricted public access to your article via IEEE Xplore.

Any other applicable charges (such as the over-length charge of \$175 per page for published pages 9 and above) will be billed separately once the manuscript formatting is complete but prior to publication.

If you'd like to make your manuscript Open Access and accept the US\$1,750 author publication charge, please contact Shauna Miller at shaunam@assoqh.org at this time. There is no action required if you prefer traditional publication in which your article will be available to all qualified subscribers and purchasers via IEEE Xplore. No Open Access payment is required for traditional submission.

For any questions regarding IEEE's Open Access policy, please refer to our Frequently Asked Questions on Open Access at http://www.ieee.org/publications_standards/publications/authors/open_access.html.

Sincerely,

Michael Oelze
Associate Editor
Transactions on Ultrasonics, Ferroelectrics, and Frequency Control

Steven Freear
Editor in Chief
Transactions on Ultrasonics, Ferroelectrics, and Frequency Control
