September 23, 2014

Dear ERASMUS committee,

This is a letter of support for Mr. Akos Makra who has completed a three month internship at Philips Research in Eindhoven from 15 June to 15 September 2014. He worked on the topic 'Pain monitoring during surgery' and was supervised by Dr Hans Weda and Dr Louis Atallah from Philips Research. He helped analyse a previously recorded dataset of skin conductance response for patients undergoing surgery to help assess their discomfort throughout the procedure.

Please do not hesitate to contact me should you have further queries.

Sincerely,

Dr Louis Atallah
