

Dr. Sezai Ercisli

Dénes Taller
*Department of Plant Genetics
Faculty of Horticultural Science
Corvinus University of Budapest*

April 25th, 2013

Dr. Sezai Ercisli, Professor at the Department of Horticulture, Ataturk University (Turkey), approves that the scientific work of **Mr. Dénes Taller** (MSc student at the Dept. Genetics and Plant Breeding at the Corvinus University of Budapest) is of an **excellent quality**.

My collaboration with the Dept. Genetics and Plant Breeding, CUB, Hungary provided internationally recognized achievements during the past three years. We have built up a common research project to study flower **incompatibility in *Prunus* species** (primarily apricot, cherry and almond) and genetic relatedness among Turkish and Hungarian tree fruit germplasm. Mr. Dénes Taller as a talented and workful student took part in this research activity, which is supported by his significant achievements at student competitions and congresses. He has also published his results in a high standard journal of plant genetics and breeding.

Based on the above-mentioned facts, **I can strongly support to adjudge the *Pro Scientia Golden Medal* to Mr. Dénes Taller.**
