Dear Ms. Kocsmár,

We are delighted to let you know that the ESP/IAP Scientific Committee for the upcoming congress in Cologne has selected your poster

Lung cancer of clinically unknown primary: An autopsy-based study

to be part of an exciting new format which is part of the ESP/IAP Congress - the Best Poster Sessions at E-Poster Terminals.

Congratulations!

The authors of the 5 best abstracts per topic (based on the total reviewing score) are invited to present their posters at the E-Poster Terminals which will for the first time be part of the poster exhibition.

Your presentation is scheduled for the

Best Poster Session Pulmonary Pathology

which will take place on

Date: 27 September 2016

Time: 16:45 - 17:15

Room: Hall 11.3 E-Poster Terminal 4

Every presenter is asked to prepare just a 1-2-minute presentation (question/approach/conclusion) so that there is enough time for discussion.

The poster area will be located in Hall 11.3 of Congress-Centrum Ost Koelnmesse.

Technical staff will be present to assist with the E-Poster Terminals.

Please note that this presentation does NOT replace the presentation of your physical poster in the morning poster session - it is additional.

We are looking forward to your contribution for the XXXI International Congress of the IAP and the 28th Congress of the ESP.

Please make sure to upload your poster electronically - as per the invitation you received in July.

If you have any questions related to the upload, please contact support@dasterminal.com

Kindly confirm by 7 September 2016 that you will be happy to present your poster electronically during the above mentioned time slot.

We look forward to your contribution.

Yours sincerely,

Prof. Pierre Bedossa

Prof. Dietmar Schmidt

Congress Presidents
