

- P413 Antiproliferative activity and apoptosis activated by clerodane diterpenes
P M P Ferreira, G C G Militão, A G Santos, A J Cavaleiro, V S Bolzani, P M Costa, F W A Barros, M O Moraes, C Pessoa
- P414 Cytotoxic action of a fraction rich in casearins on tumor cell lines
F W A Barros, P M P Ferreira, A G Santos, V S Bolzani, A J Cavaleiro, G C G Militão, A S Meira, P M Costa, M O Moraes, C Pessoa
- P415 Isopsoralen Induces Differentiation of Pre-chondrogenic ATDC5 Cells via Activation of MAP Kinases and BMP-2 Signaling Pathways
L Li, JS Eun, M Nepal, JH Ryu, HK Cho, BY Choi, CS Kim, KW Oh, Y Soh
- P417 Metanthiol induce relaxation of non-vascular smooth muscle in similar manner to sodium sulphide
A Mijuskovic, Z Orescanin - Dusic, A Nikolic - Kokic, M Slavic, D Blagojevic, I Spasojevic, M Spasic
- P418 The P2X7 receptor may be a novel therapeutic target to promote osteogenic differentiation and mineralization of postmenopausal bone marrow stromal cells
J B Noronha-Matos, A Sá-e-Sousa, J Coimbra, S Gomes, R Rocha, J Marinho, R Freitas, J Morais-Neves, M A Costa, P Correia-de-Sá
- P419 Age-dependent defective TGF-Beta signaling in human vascular smooth muscle cells and internal mammary arteries from patients undergoing coronary artery bypass grafting
S Redondo, J Navarro-Dorado, M Ramajo, Z Garcés, M Carnero, F Reguillo, E Rodriguez, P Molina, V Andrés, T Tejerina
- P420 Yessotoxin effect on A Kinase Anchoring Protein 149 (AKAP 149) in lymphocytes
A Fernández-Araujo, A Tobío, A Alfonso, LM Botana
- P421 Inhibition of proteasome system by natural compounds: source of new anti-inflammatory and anti-cancer drugs
G Costa, V Francisco, J Liberal, Mt Cruz, Mc Lopes, Mt Batista
- P422 Effect of calcium and ROCK in the regulation of human umbilical artery contractility
Joana Feiteiro, Eduarda Lemos, Ignacio Verde, Elisa Cairrao
- P423 Cyclosporine and sirolimus inhibit calcium channels in rat aorta vascular smooth muscle cells
D Maio, E Cairrao, F Reis, I Verde
- P424 D-homoestrone exhibits apoptosis and cell cycle arrest at G2/M in HeLa human cervical cancer cells
R Minorics, N Bózsity, E Mernyák, J Wölfling, Gy Schneider, I Zupkó
- P425 Antiproliferative effect and mechanism of action of novel triazol-containing estranes
I Zupkó, J Molnár, R Minorics, I Ocsóvszki, Z Kádár, É Frank, J Wölfling
- P426 Interplay between P2X7 and P2Y1 receptors controls intracellular [Ca²⁺] signals in fibroblasts of the human subcutaneous connective tissue
D Paramos, AR Pinheiro, F Ferreirinha, MA Costa, P Correia-de-Sá
- P427 Detrimental effects of restraint stress on synaptic transmission and plasticity are counteracted by the 5-HT7 receptor antagonist
B Bobula, K Tokarski, A Gadek-Michalska, G Hess
