

PROCEEDINGS

of the

15th MINI CONFERENCE ON VEHICLE SYSTEM DYNAMICS, IDENTIFICATION AND ANOMALIES

Held at the
Faculty of Transportation Engineering and Vehicle Engineering
Budapest University of Technology and Economics, Hungary
BUDAPEST, 7-9 November, 2016

Edited by Prof. I. Zobory

BUDAPEST UNIVERSITY OF TECHNOLOGY AND ECONOMICS

**THE CONFERENCE ORGANISING COMMITTEE GRATEFULLY
ACKNOWLEDGES THE GENEROSITY OF THE FOLLOWING
MAJOR SPONSORS AND SPONSORS:**

BME Faculty of Transportation and Vehicle Engineering (H)
BME Intelligent Transportation and Vehicle Systems Co. (ITS ZRt.) (H)
Knorr Bremse Brake Systems Ltd. (H)
Knorr Bremse Brake R&D Institute Budapest (H).
Knorr-Bremse Railway Vehicle Systems Hungaria Ltd. (H).
Stadlertrains Hungary Ltd. (H)
Ganz Motor Ltd. (H)
Grampet Debrecen Vagon Factory (H)

CONFERENCE PRESIDENT

Prof. Isván ZOBORY,
 Group of Railway Vehicles and
 Vehicle System Analysis,
 BME, Budapest, Hungary

INTERNATIONAL SCIENTIFIC COMMITTEE

Prof. Masato ABE.
 Kanagawa Institute of Technology, JAPAN,

Prof. Stefano BRUNI,
 Department of Mechanical Engineering,
 Milano University of Technology, ITALY

Prof. József BOKOR,
 Department of Transport Automation,
 BME, Budapest, HUNGARY

Prof. Otmar KRETTEK
 Krettek-Krettek Consulting GbRmbH, GERMANY

Prof. Peter LUGNER
 Institute of Mechanics,
 TU of Vienna, AUSTRIA

Prof. László PALKOVICS
 Ministry for Human Resources, HUNGARY

Prof. Hans G. REIMERDES
 Department of Aerospace Structures
 RWTH, Aachen, GERMANY

Prof. József ROHÁCS,
 Department of Railway Vehicles, Aircraft and Ships
 BME, Budapest, HUNGARY

Prof. Gottfried SACHS
 Department of Flight Mechanics and Control,
 TU of München, GERMANY

Prof. Yoshihiro SUDA
 Institute of Industrial Science,
 The University of Tokyo, JAPAN

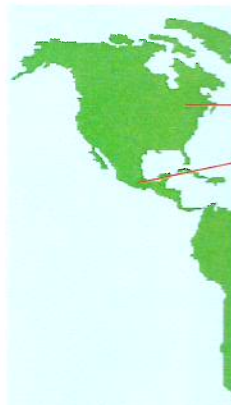

Prof. Pierre-Olivier. VANDANJON
 IFFSTAR Arcueil, FRANCE

Prof. Hans TRUE
 Institute of Mathematical Modelling,
 TU of Denmark, DENMARK

The Organising Committee thanks the authors for their efforts providing the electronic version of the full paper manuscripts. Issued by the **BME ITS ZRt.** Budapest, 2017. ISBN 978-963-313-266-1

Participants of the
Vehicle Enginee
Vehicle Enginee

ZARE, F. – VERESS, A. (Iran + Hungary)	261
Novel Application of Inverse Design Method by Means of Redesigning Compressor Stator Vanes in a Research Jet Engine	261
GATTI, B. (Hungary)	281
Development of an Innovative UAV Launcher	281
HARGITAI, CS. (Hungary)	289
New Added Mass Computation for Inland Vessels	289
SESSION FOR VEHICLE CONTROL THEORY AND INTERDISCIPLINARY SCIENCES	301
FÉNYES, D. – NÉMETH, B. – GÁSPÁR, P. (Hungary)	303
Control-Oriented Modelling of the Variable Geometry Suspension for Independent Steering Purposes	303
SÁBITZ, L. – ZOBORY, I. (Hungary)	311
Sliding Friction Coefficient and Wear Multiplier as Functions of the Tribological State-Vector	311
SZÖKE, D. – ZOBORY, I. (Hungary)	321
Dynamical Characteristics of Crank Mechanisms	321
KEHRER, K. – GUROL, S. – JETER, PH. (USA)	331
Linear Drives for Vehicles	331
TÓBIÁS, CS. – VERESS, A. (Hungary)	341
Application of Functional Mock-Up Units in Design and Development of Vehicle System Components	341
ADVERTISEMENTS	351

ANOMALIES, BUDAPEST, NOV. 7-9, 2016
