Title: Forecasting the spread between HUPX and EEX DAM prices – the case of Hungarian and German wholesale electricity prices

Dear Milan Vancsa,

We are very pleased to congratulate you the acceptance of your paper for the presentation at the International Conference on the European Energy Market 2018, which will held on 27-29 June 2018, in Łódź, Poland. Your paper was in competition with near 300 full text papers submitted.

Your paper is also legible for the publication in the IEEE XPLORE data base after fulfilment of two formal requirements: (i) transfer of Copy Rights to IEEE and (b) submission of the paper in IEEE Camera Ready format.

You can login at your account to see the scores and comments from International Scientific and Reviewing Committee. If there is a need for some corrections, you are obliged to include such corrections in the Camera Ready Paper which should be upload in the conference system before the conference.

Soon, you will receive the links to the IEEE Copy Rights form and the IEEE PDFeXpress tool allowing for preparation of Camera Ready Paper, which will be published in the IEEE XPOLORE data base.

Your paper is accepted so now you should:

1. Register at the conference. Please, remember the general rule: **One paper per one registration.** You can also select additional papers during registration.
2. Book trip and accommodation. You can find the information on the conference Webpage and our staff is pleased to assist you in travel logistic and search for accommodation.
3. Start preparing your presentation slides in *.pdf format (no more than 10 slides). Do not use too many colours and ensure adequate contrast to make your presentation more readable.

During the conference you are asked for:

1. Bring your presentation in on a pen-drive as slides in *.pdf format.
2. With the assistance of the conference technical staff install your presentation at the computer in your session room and check if you can open it and the presentation is visible on the screen.
3. The installation and its verification should be done 5-10 minutes before the session beginning.
4. It is assume that during a research session, time for each paper presentation should not exceed: 10 minute presentation and 5 minute discussion.
5. If the time dedicated for discussion is too short we encourage you to continue discussions during other conference events.

We are at the final stage of completing the allocation of research papers to presentation sessions. The draft conference program with the paper allocation will be published on the conference Webpage in a few days and we will inform you about it.

We will also send you the requirements and links to IEEE Copy Rights and IEEE PDFeXpress tool. You will have to follow these requirements to qualify your paper to the IEEE XPLORE publication.

Kind regards,
EEM Organizing Committee
