

Table of Contents

On the perception of visual durational speech features: a comparison between native and nonnative speakers	11
<i>Anna Esposito</i>	
Integration of CogInfoCom with semantic intelligent space.....	17
<i>I. M. Fülöp, G. Magyar</i>	
A taxonomy of CogInfoCom trigger types in practical use cases	21
<i>Á. Csapó, P. Baranyi, P. Várlaki</i>	
Bionics and CogInfoCom	27
<i>V. Réti, Á. Csapó</i>	
Stabilization and synchronization of dynamicons through CogInfoCom channels	33
<i>P. Baranyi, P. Galambos, Á. Csapó, P. Várlaki</i>	
Towards radical atoms – form-giving to transformable materials	37
<i>D. Lakatos, H. Ishii</i>	
Non-verbal cognitive skills and autistic conditions: an analysis and training tool.....	41
<i>H. Tanaka, S. Sakti, G. Neubig, T. Toda, N. Campbell, S. Nakamura</i>	
Cognitive infocommunications preferences of active senior citizens.....	47
<i>B. Vági, T. Fegyó, Cs. Zainkó, G. Németh, A. Kolesinski</i>	
Laughter and topic changes: temporal distribution and informaiton flow	53
<i>F. Bonin, C. Vogel, N. Campbell</i>	
Broadcast news transcription in Central-East European languages	59
<i>B. Tarján, T. Mozsolics, A. Balog, D. Halmos, T. Fegyó, P. Mihajlik</i>	
Characteristic and spectral features used in automatic prediction of vowel duration in spontaneous speech.....	65
<i>A. Beke, M. Gósy</i>	
Calculating Semantic Uncertainty.....	71
<i>G. Wirsching</i>	
Prosodic forms and pragmatic meanings: the case of the discourse marker ‘no’ in Slovak.....	77
<i>S. Benus</i>	
Acoustic, semantic and personality dimensions in the speech of traditional puppeteers.....	83
<i>M. Rusko, J. Hamar, S. Benus</i>	
BCI and Virtual Collaboration	89
<i>Á. Lóska</i>	
Establishment of the database storing and evaluating anthropometric data	95
<i>M. Taliga, H. Kertész</i>	
Effect of therapeutic riding on the coordination of movements of blind children	99
<i>H. Steiner</i>	
Effect of therapeutic riding on Center of Gravity (COG) parameters of blind children.....	103
<i>H. Steiner, Z. Kertész</i>	
Effect of therapeutic riding on joint angles parameters of visually impaired children	109
<i>H. Steiner, Z. Kertész</i>	
Saliency map estimation by constructing graphs of possible eye- tracking paths.....	137
<i>Sz. Szalai, T. Szirányi, Z. Vidnyánszky</i>	
About the fixation points in stereo images.....	143
<i>L. Czúni, J. P. Kiss</i>	
On order-independent sequential thinning	149
<i>P. Kardos, K. Palágyi</i>	
Improving human-computer interaction by gaze tracking.....	155
<i>Zs. Jankó, L. Hajder</i>	
Avoiding boredom and anxiety: a study for rehabilitation application.....	163
<i>C. Redaelli, S. Mottura, M. Sacco</i>	

Fuzzy Model based Differential IEC for Human-System Interaction in the VirCA Environment	169
<i>Z. Krizsán, Sz. Kovács</i>	
Pattern Distillation Methods in Grammar Induction	175
<i>L. Kovács, Zs. Tóth</i>	
Robot Controlling in Natural Language	181
<i>L. Kovács, P. Barabás, M. Vircikova</i>	
Understanding cognitive aspects in measuring flexibility of a supply chain	187
<i>W. D. Solvang, B. Solvang</i>	
A multi-objective decision support system (DSS) for simulation and optimization of municipal solid waste (MSW) management system.....	193
<i>H. Yu, W. D. Solvang, S. Yuan</i>	
Decisions support for production control: Insights from industry	201
<i>E. Arica, T. Nehzati, J. O. Strandhagen, H. H. Hvolby</i>	
A concept for collaborative supply chain order planning	207
<i>E. Alfnes</i>	
Computational method for corrective mechanism of cognitive decision-making biases	211
<i>P. Földesi, J. Botzheim</i>	
The human spatiotemporal comfort zone and its technology-based enhancement	219
<i>D. Dori</i>	
Advanced virtual reality visualisation systems based on a meta-model dedicated to historical knowledge	225
<i>B. Hervy, F. Laroche, J.-L. Kerouanton, A. Bernard</i>	
Cooperative tabletop working for humans and humanoid robots: early investigations into artifact indication	231
<i>H. Z. H. Mamode, P. Bremner, T. Pipe, B. Carse</i>	
Artificial companion and acceptability a problem of design?	237
<i>S. Pesty, D. Duhaut</i>	
Embedding the faetures of the users' physical environments to improve the feeling of presence in collaborative virtual environments	243
<i>T. Duval, H. Nguyen, C. Fleury, A. Chauffaut, G. Dumont, V. Gouranton</i>	
Designing and evaluating a workstation: from the digital mock-up to the realization	249
<i>C. Pontonnier, G. Dumont, A. Samani, P. Madeleine, M. Badawi</i>	
Global collaboration and transactional distance - development of a TD assessment instrument for the VISIONAIR Project	255
<i>N. Wengrowicz, Y. J. Dori, D. Dori</i>	
Qualitative comparison of 2D and 3D perception for information sharing dedicated to manufactured product design	261
<i>F. Noël, Anh Nguyen Nguyen Ba, S. Sadeghi</i>	
VirCA NET and CogInfoCom: novel challenges in future internet based augmented/virtual collaboration	267
<i>C. Weidig, Á. Csapó, J. Aurich, B. Hamann</i>	
VirCA NET: A case study for collaboration in shared virtual space	273
<i>P. Galambos, C. Weidig, P. Baranyi, J. C. Aurich, B. Hamann</i>	
Probabilistic bi-directional root-pattern relationships as cognitive model for semantic processing of arabic.....	279
<i>B. Haddad</i>	
An ensemble-based collaborative framework to support customized user needs	285
<i>A. Hajdú, J. Tóth, Z. Pistar, B. Domokos, Zs. Török</i>	
Cognitive aspects of a web-based geovisualization application.....	291
<i>M. Zichar</i>	
Surrounding robots: a localized solution for the intruder problem	297
<i>L. Blazovics, T. Lukovszki, B. Forstner</i>	
Towards biofeedback-controlled self-rewarding learning with mobile devices	303
<i>L. Szegletes, B. Forstner</i>	

Resource requirement estimation of mobil supported websites	309
<i>G. Kocsis, P. Ekler</i>	
Development and customization of individualized mobile healthcare applications	321
<i>A. Minutolo, M. Esposito, G. De Pietro</i>	
Towards easier human-robot interaction to help inexperienced operators in SMEs	333
<i>S. Pieskä, J. Kaarela, O. Saukko</i>	
Operational concepts in UAV formation monitoring of industrial emissions	339
<i>R. Kristiansen, E. Oland, D. Narayanachar</i>	
Situation aware robots and transporters.....	345
<i>J. Jämsä, S. Pieskä, M. Luimula, I. Siio, M. Komatsuzaki</i>	
RFID Communication in Container Ports	351
<i>H. Hakam, W. D. Solvang</i>	
Pragmatics in the Usability discipline	359
<i>A. S. Szöllősy, G. Vitályos</i>	
New trends in industrial robot controller user interfaces.....	365
<i>A. Aryania, T. Thomessen, G. Sziebig</i>	
Thinking about the present and future of the complex speech recognition	371
<i>K. Vicsi</i>	
Automatic prosodic and syntactic analysis from speech in Cognitive Infocommunication	377
<i>Gy. Szaszák, A. Beke</i>	
A Cognitively-Inspired Method for Meaning Representation in Dialogue Systems	383
<i>M. Grnjatović, V. Delić</i>	
Emotion recognition from spontaneous Slavic speech.....	389
<i>H. Atassi, Z. Smékal, A. Esposito</i>	
Multimodal human detection and fuzzy decisional engine for interactive behaviors of a mobile robot.....	395
<i>C. Granata, P. Bidaud</i>	
Examples of multimodal user interfaces for socially assistive robots in ambient assisted living environments	401
<i>P. Mayer, C. Beck, P. Panek</i>	
Home deployment of a doubt removal telecare service for cognitively impaired elderly people: a field deployment	407
<i>P. Rumeau, N. Vigouroux, B. Boudet, G. Lepicard, G. Fazekas, F. Nourhachemi, M. Savoldelli</i>	
"Kompaï, go docking please!"—large scale field test of a social robot in users' homes	413
<i>A. Tóth, G. Fazekas, T. Pilissy, K. Zsiga, D. Kovács, T. Nagy</i>	
Learning how to teach from „videlectures”: automatic prediction of lecture ratings based on teacher's nonverbal behavior	415
<i>P. Salvagnini, H. Salamin, M. Cristani, A. Vinciarelli, V. Murino</i>	
Key interpersonal communication skills for wheelchairs	421
<i>V. Mast, D. C. Vale</i>	
Design and development of the Slovak multimodal dialogue system with the BML Realizer Elckerlyc	427
<i>S. Ondas, J. Juhar</i>	
Annotating and analyzing emotions in a corpus of first encounters	433
<i>C. Navarretta</i>	
Car driver skills assessment based on driving postures recognition	439
<i>M.-I. Toma, L. Rothkrantz, Cs. Antonya</i>	
A system designed to control and monitor a flexible manufacturing system	447
<i>A. D. Codescu, F. Sisak</i>	
Prediction emotion student module based on CVS-emotional agent for ATS platform	453
<i>H. Moga, Cs. Antonya</i>	
On Industrial Robots and Cognitive Infocommunication.....	459
<i>Bjørn Solvang</i>	
Methods and Trends in Development of Human-System Interaction Capabilities	465
<i>László Kovács, University of Miskolc, Hungary</i>	

Intensity dependent interaction in audiovisual integration.....	469
<i>Á. Török, K. K. Asbóth, F. Honbolygó, V. Csépe</i>	
Ventriloquism aftereffect in a virtual audio-visual environment.....	475
<i>F. Honbolygó, L. Veller, V. Csépe</i>	
Modeling auditory stream segregation by predictive processes.....	479
<i>I. Winkler, T. M. Böhm, R. W. Mill, A. Bendixen, S. L. Denham</i>	
Enhancing intra-cognitive communication in product design with color-coded CAD models	487
<i>A. Bertoni, Á. Ericson</i>	
Enhancing intra-cognitive communication between engineering designers and operators: A case study in the laser welding industry.....	493
<i>C. Johansson, J. Frostevarg, A. Kaplan, M. Bertoni, K. Chirumalla</i>	
Changes in present product design - opportunities for industrial oriented research	499
<i>H. Nergård, Á. Ericson</i>	
Discussing the role of the physical model in intra-cognitive communication	505
<i>A. Håkansson, H. Nergård</i>	
Examination of the sensitivity of acoustic-phonetic parameters of speech to depression.....	511
<i>K. Vicsi, D. Sztahó, G. Kiss</i>	
Epistemic signals and emoticons affect Kudos	517
<i>C. Vogel, L. M. Sanchez</i>	
Topic change detection based on prosodic cues in unimodal setting.....	527
<i>G. Esfandiari, I. Szekrényes</i>	
The role of discourse markers in the generation and interpretation of discourse structure and coherence.....	531
<i>Á. Abuczki</i>	
Annotation of spoken syntax in relation to prosody and multimodal pragmatics.....	537
<i>H. Kis, I. Szekrényes, A. Borbély, L. Hunyadi</i>	
Multimodality and spontaneity in human-computer interactions analogies of ontogeny	543
<i>B. Alexa</i>	
A unifying framework for non-linear registration of 3D objects	547
<i>Zs. Sánta, Z. Kató</i>	
High-quality structured-light scanning of 3D objects using turntable.....	553
<i>Cs. Kazó, L. Hajder</i>	
4D Studio for Future Internet: improving foreground-background segmentation	559
<i>C. Blajovici, D. Chetverikov, Zs. Jankó</i>	
Experimental results of evolving Takagi-Sugeno fuzzy models for a nonlinear benchmark.....	567
<i>R-E. Precup, H-I. Filip, M-B. Radac, C. Pozna, C-A. Dragos, S. Preitl</i>	
A general formulation of abduction algorithms	573
<i>C. Pozna, R-E. Precup</i>	
Cognitive Control Initiative.....	579
<i>J. K. Tar, I. J. Rudas, K. Kósi, Á. Csapó, P. Baranyi</i>	
Fuzzy search space for correction of cognitive biases in constructing mathematical models.....	585
<i>Zs. Dányádi, P. Földesi, L. T. Kóczy</i>	
Characterization techniques for user's preference and navigation	591
<i>R. Mátrai, Zs. Kosztán</i>	
Human-information interaction in 3d immersive virtual environments	597
<i>A. Komlódi, K. Hercegf, E. Józsa, M. Köles</i>	
Is the heart period variability-based usability measurement of mental effort robust enough against arm movements?	601
<i>M. Köles, K. Hercegf</i>	
Trust and credibility on the web: the relationship of web experience levels and user judgments	605
<i>E. Józsa, A. Komlódi, R. Ahmad, K. Hercegf</i>	
Basic verification of body sway characteristics for personal vehicle drivers.....	611
<i>S. Ajisaka, S. Nakamura, T. Kubota, H. Hashimoto</i>	
Three-layered architecture with variable task flow for teleoperator	615
<i>K. Hoshino, Y. Kunii</i>	

Tactile sensation using vibrotactile glove interface.....	621
<i>Y. Muramatsu, M. Niitsuma</i>	
Mobile multimodal human-robot interface for virtual collaboration	627
<i>Y. E. Song, M. Niitsuma, T. Kubota, H. Hashimoto, H. I. Son</i>	
Interactive visualisation in 3D	633
<i>S. Kopácsi</i>	
Reuse and recycling for sustainability (research on product life- cycle management using cognitive info-communications).....	645
<i>György Kovács</i>	
On modeling non-word events in large vocabulary continuous speech recognition.....	649
<i>G. Sárosi, B. Tarján, A. Balog, T. Mozsolics, P. Mihajlik, T. Fegyó</i>	
Application of the NAO humanoid robot in the treatment of marrow-transplanted children	655
<i>E. Csala, G. Németh, Cs. Zainkó</i>	
A novel codebook-based excitation model for use in speech synthesis.....	661
<i>T. G. Csapó, G. Németh</i>	
Multimodal conversational interaction with a humanoid robot.....	667
<i>Á. Csapó, E. Gilmartin, J. Grizou, J. Han, R. Meena, D. Anastasiou, K. Jokinen, G. Wilcock</i>	
Integration of gestures and speech in human-robot interaction	673
<i>R. Meena, K. Jokinen, G. Wilcock</i>	
Investigating the use of non-verbal cues in human-robot interaction with a Nao robot.....	679
<i>J. Han, N. Campbell, K. Jokinen, G. Wilcock</i>	
Implementation and assessment of the automatic question generation module.....	687
<i>L. Bednarik</i>	
Automatic bank office service providing based on semantic content of the client needs	691
<i>L. Dudás</i>	
Possibilities of a multi-functional human-computer interaction in everyday life.....	697
<i>T. Gregus, G. Geda, P. Magyar, I. Fazekas</i>	
Human-robot interaction: importance, opportunities, and educational responsibility in this regard	701
<i>P. Magyar, G. Geda, T. Gregus, I. Fazekas</i>	
Our experiences during the development of the voice control for a monorail	705
<i>A. Trohák, Z. Biró, L. Méhes, J. Mária Pintér</i>	
A virtual reality platform to study rf propagation in body area networks	709
<i>K. Sayrafian-Pour, J. Hagedorn, W-B. Yang, J. Terrill</i>	
Predicting the sentiment in sentences based on words: an exploratory study on ANEW and ANET	715
<i>D. Gokcay, E. Isbilir, G. Yildirim</i>	
Influence of simulation and real implementation skills on the cognitive learning aspects	719
<i>M. Bayani</i>	
Context model for ability-based automatic UI generation.....	727
<i>M. Macik</i>	
Is Cognitive Science a science at all?	733
<i>M. Suwara, Jan W. Płazowski</i>	
Repairing conceptual relations in ontologies by means of an interactive visual reasoning: cognitive and design principles.....	739
<i>G. A. Aranda-Corral, J. Borrego-Díaz, A. M. Chávez-González</i>	
Detecting and processing objects using radio waves and opto-electrical methods	745
<i>E. Zubán, K. Kovács, H. Lábadi</i>	
Potential application of autonom and semiautonom robots in the study of animal behavior.....	759
<i>Á. Miklósi, L. Gerencsér</i>	
Cellphone evolution – applying evolution theory to an info-communication system	763
<i>T. Faragó, Á. Miklósi</i>	
Mutual communication in navigation of visually impaired.....	769
<i>J. Balata, Z. Mikovec, P. Slavík</i>	

Application of predictive coding in the evolution of artificial neural network	775
<i>H. Mohabeer, K.M.S Soyjaudah</i>	
Cutaneous mechanoreceptor simulator.....	781
<i>D. Madrigal, G. Torres, F. Ramos, L. Vega</i>	
Realization of 3D Models for Virtual Reality by Use of Advanced Scanning Methods	787
<i>J. Novak-Marcincin, J. Torok, J. Barna, M. Janak , L. Novakova-Marcincinova and V. Fecova</i>	
Entrainment in spontaneous speech: the case of filled pauses in Supreme Court hearings	793
<i>Štefan Beňuš, Rivka Levitan and Julia Hirschberg</i>
