RE IEEE R8 SPC 2017

Dear Mr Taczi,

The jury members looked at all the valid entries, and as usual had the tough task of deciding on the best five papers to select.

IEEE R8 SAC is happy to announce that your paper "*Enhancing Power System Stability with Synthetic Inertia*" has been classified as one of the best five papers, that will be presented at Eurocon 2017 in Ohrid, Macedonia. The oral presentation will be held within the conference being held between July 6 to July 8 on a date and time to be still decided.

You will receive a formal document informing you about the details and conditions attached to the award soon. You will also receive further information on the preparation of a camera-ready paper to be included in the conference proceedings in another email.

Regards,

Margaretha Eriksson IEEE Region 8 Director

Efthymia K. Arvaniti Vice-Chair Student Activities

Paul Micallef SPC Coordinator
