

BEST STUDENT POSTER PRESENTATION AWARD

granted to

Ewa Oravec
at the

16th Meeting of the Central European Tectonic Groups
18-21 April, 2018 - Rytro, Poland

"The Central European Tectonic Groups is an open scientific association bringing together the geoscientists with the interest in geodynamic processes of the Earth crust in a broad measure. The main topics of the annual meetings are the problems of structural evolution of the orogenic belts, the basin evolution, relationship of magmatism and tectonics and many others, studied by the methods of structural geology, petrology, geochemistry, sedimentology and geophysics."
