

Subject: *IEEE IECON2016 - Florence Italy, Paper: #783 - Author's notification letter*

Dear *Pal Varga*,

It is our pleasure to inform you that your paper:

Revising the arrowhead framework and its core services for advanced functionalities

authored by:

Pal Varga, Csaba Hegedus, Daniel Kozma, Gabor Soos

has been provisionally accepted for presentation in the 42nd IEEE Industrial Electronics Conference (IEEE IECON2016) to be held in Firenze (Florence), Italy, October 24-27, 2016: our sincere congratulations!

Reviewers' comments are available at the submission system.

You are required to carefully revise your manuscript according to reviewers' comments and recommendation and to include, if available, most recent results.

Your final version might have to be properly checked to ensure that the critical comments were addressed and the recommended changes were made. The final version will fundamentally correspond in length and contents to the submitted version, except for those parts that might be added or modified to comply with the reviewers' suggestions. It is considered unethical to shorten or otherwise alter the final version in ways that make it weaker than what has been approved by the reviewers. Update the reference list with relevant recent works.

Please notice that IEEE imposes strict rules on intellectual property and on quality of PDF files, therefore, before final submission you are required to check your manuscript using CrossCheck® and PDF eXpress® Plus. Both services are offered to authors by IEEE.

Details about preparation and submission of final manuscripts will be available at:

<http://iecon2016.org/index.php/submission>

The submission system is located at:

<http://cms.iecon2016.org>

IEEE IECON conference policy requires that each full, regular registration entitles an author to publish up to one paper. If you would like to submit two papers, please apply for additional paper € 200.00 instead of making two registrations, so that you can obtain the discounted rate. If you would like to submit three or more papers, please register twice (one registration with additional paper and another registration).

Note that for the manuscript to be included in the program and the proceedings of the conference and be sent to IEEEExplore, you must fulfill the following four conditions:

1. Successfull Crosscheck[®] and PDF eXpress[®] Plus check (a proof has to be provided during final paper upload)
2. Registration of at least one author
3. Upload of final version
4. Transfer of copyright to IEEE.

Please note that all these steps must be completed by July 20th. After this date you'll incur in higher registration rate and in potential esclusion of your paper from conference proceedings.

When the program of the conference is finished we will inform you of the date and time allocated for your presentation, as well as the instructions for you to present your work.

Authors requiring visa to enter Italy must start the process for getting it soon. Instructions are available at conference web site. An invitation letter to obtain visa will be provided upon request, after paper upload.

Also, information on the hotel accommodation, technical tours, etc., will be soon available at:

<http://iecon2016.org>

Please check the website regularly after July 1st for these and other program updates.

If you have any questions, please contact our team at: **info@iecon2016.org** or at any specific email address listed in the website.

We look forward to welcoming you in Firenze, Italy!

Sincerely,

Carlo Cecati, Yousef Ibrahim, Bogdan Wilamowski, General Co-Chairs
