Subject: ICC 2017: Abstract Submission Acceptance - Oral Presentation

To: albert@ludens.elte.hu

Cc: maillog@conferenceabstracts.com, ICC2017program@conferencemanagers.com

Dear Gáspár Albert,

Congratulations. Your ICC 2017 submission titled, How hard is it to design maps for beginners, intermediates and experts? (253636) has been accepted as an Oral Presentation, which was your format preference for the International Cartographic Conference in Washington DC.

Submissions were reviewed by members of the International Scientific Program Committee. Reviewers rated submissions on six criteria and they recommended presentation formats.

Your overall average review score on six criteria was 1.33166666666667 (1.0 is the best score and 3.0 is the poorest score). Most submissions were reviewed by three people and some by two.

The review criteria were:

- The topic is relevant to the interests of cartography and/or geographic information science (GIScience).
- The topic is original and is likely to advance the fields of cartography and/or GIScience.
- Products or services are discussed with active commercial intent.
- The topic is clear and the manuscript/abstract is well structured.
- Results or interpretations are reported.
- Substantial conclusions or recommendations are summarized.

Some reviewers also provided comments on your submission, which are listed below:

Next steps are for you to complete your manuscript or proceedings paper for the conference. Decisions on acceptance for the refereed book track as well as information on submission and formatting for papers will be sent in a separate email.

You will need to register for the conference by February 16, 2017, to retain your status as a presenter. Please register for ICC 2017 at: <http://icc2017.org/attendee-registration-form/>

Please make your conference hotel reservations as soon as possible because the block of inexpensive rooms we have set aside for participants at the Washington Marriott Wardman Park will fill: <http://icc2017.org/conference-hotel/>
