Academic Year 2018/2020

After the Mobility

Table D - Traineeship Certificate by the Receiving Organisation/Enterprise

Name of the trainee: Barbara Fülöp

Name of the Receiving Organisation/Enterprise: University of Split, Clinical Hospital Center

Sector of the Receiving Organisation/Enterprise: Department of Paediatrics

Address of the Receiving Organisation/Enterprise [street, city, country, phone, e-mail address], website:

Spinciceva 1, 21000 Split, Croatia; office@kbsplit.hr, <http://www.kbsplit.hr>

Start date and end date of traineeship: from [day/month/year] 02/07/2018. to [day/month/year] 06/08/2018.

Traineeship title:

clinical practices

Detailed programme of the traineeship period including tasks carried out by the trainee:

During the 5 weeks of the practice Barbara was able to visit all parts of the paediatrics department. She spent 3-4 days at the same part, getting involved in the rhythm of the clinic. She participated in the visits during the morning; she could follow patients during the diagnostic procedures. During her stay she could participate in different kind of testing procedures (uroflowmetry, transesophageal echocardiography, etc.), and also she was involved in setting the diagnosis, and deciding about the treatment. A regular presence of her was required at medical workshops, consultations, graduate and postgraduate teaching programs of the ward.

Knowledge, skills (intellectual and practical) and competences acquired (achieved Learning Outcomes):

The primary aim of the six-week bedside practice (including one week for the examination) of the sixth year students was to attach theoretical knowledge to the practical one, furthermore to get some experiences in the most common manual activities at least at a basic level.

Another task during that time was to observe and take part in the practical management of the most common paediatric diseases, both at the hospital and after discharge.

Monitoring of children in critical conditions. Dehydration: causes and differential diagnosis. Theory and practice of fluid therapy.

Disorders of sodium/potassium and acid/base regulation and their treatment.

Shock: types, symptoms, differential diagnosis. Usefulness of ultrasound diagnostics in infants and children. Imaging examinations.

Evaluation of the psychosomatic development of the infant; recognition of the normal and abnormal variations.

Diagnosis and differential diagnosis of fever in infancy and childhood. Use of antibiotics. Principles and practice of vaccinations.

Symptomatic treatment in infants and children (fever reducers and painkillers, anticonvulsants, mucolytics, medications affecting respiration and circulation)

Evaluation of the trainee:

During her work at Pediatric Department Barbara showed as hard worker, polite with patients and staff. She was more for acceptance of knowledge. We had very good personal communication and collaboration.

Date: 13/08/2018
