LOD 2020 Review Reminder

1 üzenet

LOD 2020 <lod2020@easychair.org>
Címzett: Patrik Reizinger <rpatrik96@sch.bme.hu>

2020. április 9. 19:33

Dear Patrik,

In order to avoid 1) conflicts of interest and 2) articles with topics that are not relevant to the competencies of the reviewers, we have modified some assignments. For this reason, some PC members will have identified changes to their initial assignments.

We would like to reiterate once again to report (as soon as possible):

- 1) possible* conflicts of interest*,
- 2) articles with research *topics outside the competence of the member PC*.

These reports are really important for a proper and serious review process.

Reviews of articles carried out by non experts in the field undermine the review process of the article itself. If this is the case, PC members can select experienced *sub-reviewers*; this practice is strongly recommended.

Once again we thank you for your valuable cooperation for the smooth running of the conference. We will never tire of repeating that this process is perhaps the most important part of a serious scientific conference.

Finally, we remind you that the *deadline for reviews is April 30*.
Please find enclosed the list of papers for which we did not receive your review yet.

Best regards,
LOD 2020 Organizing Committee.

Dear Patrik - LOD 2020 PC Member,

you are receiving this new assignment/reminder because

- * unfortunately some PC members have not delivered (for various reasons) the review report(s) or
- ** there are other papers to review (hence this is a *new assignment*) or
- *** we did not receive your review yet.

We would like to ask you the last effort. We thank you for your willingness and patience.

Please find below the list of paper(s) assigned to you for reviewing.

As you know, the Paper Review Process is probably *the most important and crucial task* of developing a strong Technical Program for an International Scientific Conference.

Submissions to LOD conferences must undergo a serious, detailed and fair review process by world-renowned independent referees who are knowledgeable in the pertinent subject areas of LOD Conference.

We want to establish the LOD Conference as a top multidisciplinary conference in Machine Learning, Optimization and Data Science. Hence, we ask you to be objective, thorough, constructive, meticulous and fair.

We received a good number of submissions.

We therefore ask you a greater effort to review all the manuscripts received.

Thank you for your great and kind support, patience and availability.

We remember you that we have the following *Four Types of Submissions/Papers*:

- 1) Long Paper: original novel and unpublished work (max. 12 pages in Springer LNCS format);
- 2) Short Paper: an extended abstract of novel work (max. 4 pages in Springer LNCS format);
- 3) work for oral presentation only (no page restriction; any format). For example, work already published elsewhere, which is relevant and which may solicit fruitful discussion at the conference;
- 4) Abstract for Poster Presentation only (max 2 pages; any format). The poster format for the presentation is A0 (118.9 cm high and 84.1 cm wide, respectively 46.8 x 33.1 inch). For research work which is relevant and which may solicit fruitful discussion at the conference.

Following the tradition of LOD, we expect high-quality papers in terms of their scientific contribution, rigor, correctness, quality of presentation and reproducibility of experiments.

- * Accepted papers must contain significant novel results.
- * Results can be either theoretical or empirical.
- * Results will be judged on the degree to which they have been objectively established and/or their potential for scientific and technological impact.

To access the papers assigned to you and to fill in the online referee report please log into the system at

<https://easychair.org/conferences/?conf=lod2020>

and enter your EasyChair username and password.

Alternatively, you can log in to EasyChair using

<https://www.easychair.org/conferences/>

and find LOD 2020 in your list of conferences.

If you forgot your user name or password, you should access:

Gmail - LOD 2020 Review Reminder - Last Mile, Thanks!

Please check the papers that were assigned to you as soon as possible and let us know (lod@icas.xyz) in case there is any problem (e.g., conflict of interest).

Reviews are due by *June 12, 2020*

In order to ensure a good review process, it is very important that you complete all your reviews in a timely matter.

Please find below the list of papers assigned to you for reviewing.

Please be objective, thorough, constructive, meticulous, detailed and fair, thanks!

Thanks a lot for your support!

LOD 2020 Chairs.
