ABSTRACT BOOK

Edited by Ľubomír Hambálek, Richard Komžík, Theodor Pribulla

Observing techniques, instrumentation and science for metre-class telescopes

II

Conference

Tatranská Lomnica, Slovakia

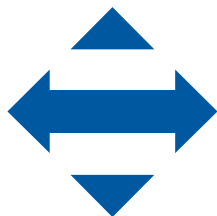

September 24 – 28, 2018

Organized by

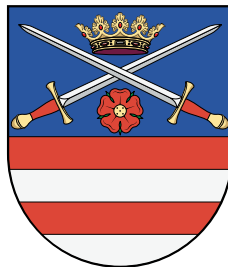

Astronomical Institute, Slovak Academy of Sciences

SPONSORS

**SLOVAK RESEARCH
AND DEVELOPMENT
AGENCY**

CONTENTS

Session A: OBSERVING TECHNIQUES AND INSTRUMENTATION FOR METRE-CLASS TELESCOPES	8
A 01 <i>L. Zampieri (for the AQUEYE+IQUEYE collaboration):</i> Fast astronomical photometry for meter-class telescopes	8
A 02 <i>R.M. Roettenbacher:</i> Interferometry with Meter-Class Telescopes	8
A 03 <i>M. Lendl:</i> High precision ground-based photometry	10
A 04 <i>P. Mikołajczyk:</i> Precise photometry with the use of 60-cm Cassegrain reflector of Białków, Poland	10
A 05 <i>R.J. Harris, Th. Anagnos, P. Hottinger:</i> Astrophotonics for small telescopes	10
A 06 <i>P. Zieliński, Ł. Wyrzykowski, K. Rybicki, Z. Kołaczowski, P. Bruś, P. Mikołajczyk:</i> The Cambridge Photometric Calibration Server 2.0 – new automatic tool for time-domain astronomy	12
A 07 <i>M. Zejda, O. Skýba, M. Krajčovič:</i> Photometric data around us	12
A 08 <i>M. Skarka:</i> Synergy of professional and amateur astronomers	14
A 09 <i>J. Davies:</i> The OPTICON Trans-National Access programme.	14
A P01 <i>M. Sachkov, V. Panchuk, V. Klochkova, S. Sichevsky, E. Kanev, A. Kartashova:</i> Spectroscopic instrumentation of 1-m class telescopes for ground support of the space mission WSO-UV	16
A P02 <i>M. Sachkov, S. Sichevsky, E. Kanev, A. Kartashova:</i> WSO-UV Field Camera Unit: Science Case and Ground Support with 1-m class telescopes	16
A P03 <i>P. Kostić, O. Vince, S. Samurović, A. Vudragović:</i> Current status of the Milanković telescope	16
A P04 <i>Š. Parimucha, M. Čokina, M. Fedurco, P. Gajdoš:</i> SKVO - Slovak Virtual Observatory	18
A P05 <i>V. Savanevych, O. Briukhovetskyi, S. Khlamov, A. Pohorelov, V. Vlasenko, P. Dubovský, I. Kudzej, Š. Parimucha:</i> CoLiTecVS - new tool for automated reduction of photometric observations	18
A P06 <i>T. Döhring, T. Pribulla, R. Komžík, M. Mann, P. Sivanič, M. Stollenwerk:</i> Slovak-Bavarian collaboration on the development of telescope instrumentation	18
Session B: SCIENCE WITH SMALL TELESCOPES	20
B 01 <i>U. Munari:</i> The study of novae with small telescopes	20
B 02 <i>D. Chochol, S.Yu. Shugarov, L. Hambálek, J. Guarro:</i> Optical photometry and spectroscopy of V612 Sct: slow classical nova with rebrightenings.	20
B 03 <i>P. Golysheva, S.Yu. Shugarov, N. Katysheva:</i> Multicolor Photometry of unusual Nova KT Eri	22
B 04 <i>L. Szabados:</i> Selected new results on pulsating variable stars	22
B 05 <i>M. Pawlak:</i> ASAS-SN a as stellar variability survey	22
B 06 <i>D.Yu. Tsvetkov, N.N. Pavlyuk, S.Yu. Shugarov, I.M. Volkov:</i> Optical observations of bright Supernovae	24
B 07 <i>A. Skopal:</i> Studying symbiotic stars and classical nova outbursts with small telescopes	24
B 08 <i>R. Gális, J. Merc, L. Leedjäv:</i> The current active stage of the symbiotic system AG Draconis	26
B 09 <i>K. Isogai, T. Kato and VSNET collaborations:</i> Recent progress of research on evolution of dwarf novae by using time-series photometry	28
B 10 <i>N. Katysheva, S.Yu. Shugarov, O. Vozyakova:</i> An evolution of superhumps of a WZ Sge-type system in Leonis OT J104411.4+211307	28

B 11	<i>E. Pavlenko, K. Nijima, P. Mason, N. Wells, A. Sosnovskij, K. Antonyuk, A. Simon, N. Pit, C. Littlefield, I. Hiroshi, S. Kiyota, T. Tordai, P. Dubovsky, T. Vanmunster, G. Stone, T. Kato, A. Sergeev, V. Godunova, E. Lyumanov, O. Antonyuk, V. Baklanov, Ju. Babina, K. Isogai, Ya. Romanyuk, V. Troianskyi, V. Kashuba:</i> ASASSN-18fk: a new WZ Sge-type dwarf nova with multiple rebrightenings and a new candidate for superhumping intermediate polars	30
B 12	<i>F. Teyssier:</i> Spectroscopic Monitoring of Eruptive Stars and the ARAS database	32
B 13	<i>J. Merc, R. Gális, F. Teyssier:</i> Study of long-term spectroscopic variability of symbiotic stars based on observations of the ARAS Group	32
B 14	<i>O. Yu. Barsunova, V.P. Grinin, S.G. Sergeev, A.A. Arkharov, S. Yu. Shugarov, N.V. Efimova:</i> UX Ori type stars in the young cluster IC 348. Results of the 15-year photometric monitoring.	34
B 15	<i>V. Bakis, G. Yucel, H. Bakis:</i> Digging Out Twin-Binary Star Systems from the ASAS Catalogue and Determining Their Physical Parameters	34
B 16	<i>R.E. Mennickent, G. Djurasevic, L.J. Garcés, J.A. Rosales Guzmán:</i> Results of monitoring hot Algols showing long photometric cycles	36
B 17	<i>P. Zasche:</i> Double eclipsing systems	36
B 18	<i>M. Cabezas, P. Hadrava:</i> KOREL disentangling of the LMC eclipsing Algol OGLE-LMC-DPV-065	38
B 19	<i>M. Ratajczak, A. Pigulski, K. Pavlovski:</i> Tracking Massive Pairs	38
B 20	<i>E. Panko, O. Sergienko, A. Pomazan, D. Bodryagin, D. Maleta:</i> Observations of Slightly Studied CBS with period variations	38
B 21	<i>B. Debski:</i> A relation between the brightness maxima separation and mass ratio in contact binaries	40
B 22	<i>J. Vos, M. Vuckovic, X. Chen, B. Barlow, R. Østensen:</i> Using wide sdB+MS binaries to constrain RLOF models	40
B 23	<i>S. Zola, W. Ogloza, M. Drozd:</i> Parameters of 2MASS J16211735+4412541 in the quiescent state	42
B 24	<i>İ. Özavcı, H.V. Şenavcı, E. Bahar, E. Işık:</i> Surface Inhomogeneities of the Eclipsing Binary ER Vul	42
B 25	<i>B. Seli, L. Kriskovics, K. Vida:</i> Deriving photospheric parameters and elemental abundances for a sample of stars showing the FIP effect	42
B 26	<i>A. Shugarov, M. Nalivkin:</i> INASAN NEO finder (INF) project	44
B 27	<i>I.M. Volkov, S.I. Barabanov, I.V. Nikolenko, S.V. Kryuchkov, A.V. Sergeev:</i> Spectral observations and photometry of near Earth object (NEO) 2001CP44-s1	44
B 28	<i>J. Šilha:</i> Small telescopes and their application in space debris research and space surveillance tracking	46
B 29	<i>T. Zwitter:</i> Galactic astronomy and small telescopes	46
B 30	<i>G. Zhou, D. Latham:</i> Planets across the HR diagram	48
B 31	<i>D. Bayliss:</i> The Next Generation Transit Survey (NGTS)	48
B 32	<i>M. Mugrauer:</i> YETI - The <u>Y</u> oung <u>E</u> xoplanet <u>T</u> ransit <u>I</u> nitiative	50
B 33	<i>M. Mallonn, T. Granzer, K.G. Strassmeier:</i> Exoplanet science with the robotic 1.2m STELLA observatory	50
B 34	<i>S. Yalcinkaya, B. Keten, E. Esmer, O. Basturk:</i> Timing precision in defocused observations of exoplanet transits with a meter-size telescope	52
B 35	<i>G. Maciejewski:</i> Planet-star tidal interactions with precise transit timing	52
B 36	<i>L. Neslušan, J. Budaj:</i> Mysterious eclipses in the light curve of Boyajian star: a possible explanation	54
