

Poster

P1	Alina Zamfir	National Institute for R&D in Electrochemistry and Condensed Matter	Microfluidics MS-based assay for studying the noncovalent interactions of α -Synuclein with glioma gangliosides
P2	Ulrike Resch	Medical University of Vienna	Comparative proteomic characterization of outer membrane vesicles (OMVs) isolated from multidrug resistant <i>Klebsiella pneumoniae</i> type-specific vaccines
P3	Monika Cziferszky	University of Innsbruck	Investigating Molecular Interactions of Organometallic Complexes with Model Peptides by Mass Spectrometry
P4	Ica Raluca	National Institute for R&D in Electrochemistry and Condensed Matter	Identification and characterization of ganglioside structures associated to brain aging by Orbitrap MS
P5	Alina-Iulina Petrut	National Institute for R&D in Electrochemistry and Condensed Matter	High resolution mass spectrometry profiling and fragmentation of glycolipids expressed in human hemangioma
P6	Clemens Grünwald-Gruber	University of Natural Resources and Life Sciences Vienna	Analysis of bacterial arabinosyl transferase reaction products of Kdo2-lipid A by LC-ESI-MS
P7	Ágnes Horváthová	Slovak Academy of Sciences	MALDI-TOF analysis for identification and classification of yeast associated with meadow plants in Central and Western Slovakia
P8	Patrik Mehlsack	University of Graz	<i>Andiperla morenensis</i> : insect lipidome adaptation to life on a glacier
P9	Bassam Lajin	University of Graz	Non-metal speciation analysis by HPLC-ICPMS/MS
P10	Filip Pančík	Slovak Academy of Sciences	MALDI TOF/TOF analysis of oligosaccharides from seaweed samples
P11	Marek Šebela	Palacky University in Olomouc	MALDI-TOF mass spectrometry of inhibitor-treated cyanobacteria
P12	Veronika Lukáčová	MEDIREX Group Academy n.o.	Proteomic and glycomic characterization of microvesicles by mass spectrometry
P13	Dmitry Kechasov	Norwegian Institute of Bioeconomy Research	Effect of organic fertiliser on metabolic profile of hydroponically cultivated tomato
P14	Kurt Varmuza	TU Wien	ICP-MS of meteorite samples: chemometric evaluation of diversity and discrimination
P15	Stephanie Steinberger	TU Wien	MALDI MS supports method development for gas-phase electrophoresis of extracellular vesicles
P16	Oliver Greitbauer	Biomin Holding GmbH	Quantification of bacitracin in broiler feed and digesta – MRM3 vs. QTOF
P17	Anna Turyanskaya	TU Wien	Correlation of μ XRF and LA-ICP-MS in analysis of human bone-cartilage sample
P18	Barbora Stratilová	Slovak Academy of Sciences	MALDI spectra database for Culture Collection of Yeasts (CCY)
P19	Fanni Bugyi	Research Center for Natural Sciences Budapest	The effects of PTMs on proteomic searches
P20	Gábor Tóth	Research Center for Natural Sciences Budapest	HPLC-MS investigation of glycosaminoglycan disaccharides
P21	Cristina Coman	University of Vienna	Modified hippocampal lipid signaling pathways triggered by lifestyle conditions: a multi-omics perspective
P22	Elisavet Kunz-Vekiru	Biomin Research Center	The <i>B. subtilis</i> CotA laccase metabolizes Aflatoxin B1 into Aflatoxin Q1 and epi-Aflatoxin Q1
P23	Georg Weingart	Biomin Holding GmbH	Quantitative determination of phytogetic compounds in chicken breast muscle, skin and fat by GC-MS/MS
P24	Pavel Rehulka	Faculty of Military Health Sciences,	Fractionation of complex peptide samples using manual HILIC chromatography

		University of Defence	
P25	Ivana Karmelic	University of Zagreb	LC-MS/MS Characterization of Sphingoid Bases from Neutral and Acidic (Glyco)Sphingolipids in Glioblastoma Multiforme
P26	Martina Marchetti-Deschmann	TU Wien	Bacterial Responses to Different Cultivation Conditions – A Correlated Multimodal Imaging Approach

Institute of Chemical Technologies and Analytics
