

To Whom It May Concern,

I, Attila Varga PhD, Senior Research Fellow of the Eötvös Loránd University (ELTE), Institute of People–Environment Transaction (EKTI) and President of the Environmental Education and Sustainability Research Network of the Hungarian Educational Research Association (HERA) certify that

Borbála JÁGER

presented at the online workshop

Connection between environmental psychology and environmental pedagogy

organized by the cooperation of the

*Eötvös Loránd University, Institute of People–Environment Transaction and the
Hungarian Educational Research Association, Environmental Education Network*

on November 20th, 2020.

The title of Borbála's presentation was

Climate Adventures - Online Education of Climate Change and Sustainability.

In the first part of the workshop, two plenary sessions were held on the connection between environmental psychology and pedagogy, and on the national and international publication opportunities in the field of environmental pedagogy and the education of sustainability.

In the next session, PhD and MSc students doing research in the field presented thought-provoking talks on the topic from different perspectives, in addition to the colleagues of EKI and HERA. Presentations encompassed the topics of the psychological effects of the educational environment; pedagogical and psychological challenges connected to climate change; environmental attitude and awareness among students.

The workshop aimed to enhance the cooperation between researchers and institutional expertise in hope of future collaboration and teamwork about the education of sustainability.

Borbála presented her self-developed online educational program, as a possible tool to support education of climate change and to raise environmental awareness among primary school children.

Budapest, 21.01.2021.

Attila Varga

President of the Environmental Education and Network
of the Hungarian Educational Research Association (HERA)
