

Budapest, 26 May, 2022

Gábor Till,

To Whom It May Concern

Hereby, I would like to prove that Mr. Gábor Till participated in April, 2022 in the BCG Strategy Cup regional case study competition in Hungary, in which he and his team took the second place.

The BCG Strategy Cup is a regional, team-based business game that challenges participating students to solve a real life business case.

From all applicants a group of students are selected each year based on their CVs and online test results. BCG forms competing teams from the applicants. Each team is formed to maximize the heterogeneity of the students' backgrounds. The language of the case competition is English, however students must have a working knowledge of Hungarian, Serbian, Croatian, Slovenian or Romanian.

Each team has to present their approach and strategy regarding the business case. Presentations are in English to a selected group of BCG and industry executives acting in the role of client management.

Sincerely,
Judit Zombori
