

Genova, May 9th 2023

To whomever may be concerned

In the quality of chair of the Scientific and Local Organizing Committees of the Conference “Proving the Universe with Multi-Messenger Astrophysics” <https://agenda.infn.it/event/18651/>, held in Sestri Levante (Italy) in September 2022, I certify that the proceedings of the contribution “**Measuring the beta-decay properties for exotic rare-earth isotopes**” given by Dr. Sándor Kovács from the University of Debrecen (Hungary) are going to be published by the editor Genova University Press <https://gup.unige.it> in June 2023, as a special issue in the collection “Physics”.

Best regards
Silvano TOSI

A handwritten signature in blue ink, appearing to read 'Silvano Tosi'.
