Subject: SAMI 2021 submission 88 / notification
To: Dániel András Drexler <drexler.daniel@nik.uni-obuda.hu>

Dear authors,

regarding your submission to SAMI 2021 entitled

Parameter identification of a tumor model using artificial neural networks.

Thank you for your paper submission to conference 19th IEEE World Symposium on Applied Machine Intelligence and Informatics (SAMI 2021) planned to be organized on January 21-23, 2020 in Herľany, Slovakia.

The health and safety of our members and participants is our first priority. For the safety of all involved, SAMI 2021 will be a virtual conference.

Please, do not arrange any travel plans.

All accepted papers are going forward in the process as follows:

- Authors should correct the paper, and upload the very final paper into IEEE eXpress Plus (all info is available on <http://conf.uni-obuda.hu/sami2021/paper.html>) until December 11.
 - At least one author of each paper must register online until December 11 on the conference website, <http://conf.uni-obuda.hu/sami2021/registration.html>. The registration fee is reduced to 150 Euros.
 - The registration fee must be paid until December 11.
 - Authors are kindly asked to prepare a presentation (video, pdf, ppt, any kind of method), and send back to conf-contact@uni-obuda.hu, then a confirmation will be sent in return to the author. It is equal to onsite presentation. Deadline is December 11.
- No live sessions.

After the conference, the online proceedings will be available to the authors.

We are really sad that it is not possible to meet face-to-face, but safety is our first priority.

Take care and stay home if possible.

Congratulations! Your paper has been accepted after review process.

Result of review: accepted

Please, correct / modify your paper according to reviewers' notes.

Reviewer's comments:

Review 1:

The article is well divided and written, and very current and interesting, but so short. From the sufficient number of references and mostly journals from renowned publishers, you can see the quality of the article and especially the analysis of the current state and an overview of authors in the issue. However, in the introduction (at least by a short breakdown of the used grouped links [1] - [4], [5] - [7], ..., to write why the given link was used, what were the benefits for you, etc.) there is enough space to improve and expand the article (From the point of view of the scope of the article, the authors also still have enough space-pages). The authors present their results with clear, high-quality images. However, even here there is enough space to expand the article (more detailed description of results, pictures, etc.). From a formal point of view, the article is at a good level. Small observations are as follows:

- numbering of authors? check the article according to the IEEE template
- in the sentence: "... where (6) is tumor proliferation with rate a ..." certain (6) ???
- the abbreviation PKNN, even though it has already been listed, but in the title of the subchapter I would write it down

I recommend accepting and publishing the article after removing minor comments and appropriately extending the introduction and the results achieved.

Review 2:

The paper deals with a very actual topic. I would especially like to highlight the presented results and performed experiments. Some numerical evaluation of the results would be desirable in conclusion of the paper. I otherwise recommend to accept the paper after its proof reading by the authors.

All info regarding final paper submission is available on

<http://conf.uni-obuda.hu/sami2021/paper.html>.

For final paper submission please use PDF eXpress Plus (<http://www.pdf-express.org/plus>) to submit your paper until December 11. If your paper is not created totally similar to IEEE format and requirements, it will not be included into IEEE Xplore database after the conference.

Conference ID is 50585XP

Paper collecting site is IEEE PDF eXpress Plus. It is open until December 11. No paper is accepted after this deadline.

Authors are allowed to submit a paper only once, no duplicated papers are accepted.

Please, note that authors will not be informed if the paper fails IEEE PDF check, but the paper will automatically be removed from the final program and proceedings.

The paper should be original and unpublished.

Please, do not copy from other publication, because the paper will be checked by IEEE plagiarism detection software, and it will indicate if there are copied parts.

Registration is completed if you

- uploaded the final paper;
- arranged the registration fee payment on time, so it should be RECEIVED by December 11;
- filled in the online registration form on the conference website.

If you miss any of the registration steps above, your paper will be removed on December 12 (without any notice).

Thank you for your cooperation!

Best regards,

SAMI 2021 Organizing Committee
