Dear Author

On behalf of the International Conference on Education and New Developments 2023 (END 2023-), we are pleased to inform you that your submission has been accepted for Oral Presentation.

We have included the reviewers' comments at the end of this message.

To have your submission published and participate in the conference, you need to login to your author area available at https://www.confmanager.org/end2023/author_menu.asp with your login and password, and do the following actions until 17 April 2023:

a) Register for the conference (early fee available until 17 April 2023) - access <http://end-educationconference.org/registration/> for the rates;

b) Send the Copyright form filled out and signed to the secretariat - please access <http://end-educationconference.org/final-submission-copyright/> to download the form, or access it through your author area;

c) Submit the final submission paper in WORD format (.rtf, .doc or .docx formats only, .pdf files are not allowed) through your author area in order to be published in the Conference Proceedings (maximum of 5 pages for an Oral Presentation) - please also access <http://end-educationconference.org/final-submission-copyright/> to download the final submission template.

d) Reserve your room at the Conference Hotel at your earliest convenience - please access <http://end-educationconference.org/venuehotel-information/> (also available through your author area).

e) Check carefully the guidelines for presenters available at <http://end-educationconference.org/guidelines/>.

Looking forward to your participation in the END 2023 conference in Lisbon, Portugal.

Congratulations!

Mafalda Carmo

END 2023 Conference and Program Chair

World Institute for Advanced Research and Science (WIARS), Portugal

Paper Title: Developing young children

Submission code: 495

Evaluation Results:

Originality: 6 - Good

Significance: 7 - Excellent

Technical: 3 - Not Very Good

Relevance: 6 - Good

Classification: 5 - Average

Comments: The methodology is too poor. There are no research questions, number of participants, instrumentation. There is a more general presentation of the research. The reader can not interpret fully the results.

Positive Points: The research is very interesting and it reflects the new trends in education.

Negative Points: There is not adequate information concerning the methodological design.

Originality: 7 - Excellent

Significance: 7 - Excellent

Technical: 6 - Good

Relevance: 7 - Excellent

Classification: 6 - Good

Comments: The study is interesting and the topic is relevant for the conference. Cooperation and interaction are important aspects for a successful learning process. The method is clear and the results are very useful.

Positive Points: The topic is interesting. The method and the results are clear and well written.

Negative Points: No negative point.
