SELYE SYMPOSIUM 2023

PRESIDENTIAL GREETING

Dear Colleagues,

The Selye Symposium 2023 conference is a huge step towards making our community not only a social network but rather an effective resource which can improve everyone's research activity via idea and skill sharing.

This event means an annual milestone of the long-term collaboration between our members and the consolidation of our extended network of young researchers willing to help each other's work.

I wish you many successes during your work together in the future.
