Tárgy: [SCSP2023 & ETC 2023] Your submission has been accepted!

On behalf of the Smart Cities Symposium Prague 2023, I am pleased to inform you that your submission, titled **Assessing the impact of climate change and weather conditions endangering inland waterway** has been PRELIMINARY ACCEPTED.

We have included the reviewers' feedback or justification of the scientific committee's decision at the end of this message.

April 28, 2023 is the last day to submit the camera-ready version of your paper for final acceptance. Your paper must reflect on the reviewers' comments.

In order for our editors to check how you have reacted to the reviewers' comments, please, e-mail a PDF file (file name shall be the submission number of your paper, e.g. 42.pdf) summarizing how you have modified your paper to navrakr1@fd.cvut.cz This is mandatory for each paper.

Congratulations,
Program Committee, SCSP2023

AUTHOR COMMENTS: The paper is interesting and provides an overview in the area of inland water transportation. However, the authors only report the results of the questionnaire on the influence of weather conditions on the problem discussed. The main result is that low water level is the biggest challenge for IWW transportation which is further worsened by the climate change. The further plan of the authors is to elaborate the conceptual and data model of an integrated IWW transportation information service.

More information about the data used should be provided in the paper to understand its contribution. The typos in the text should be corrected, e.g., "Section II. contains the review....", ""freeze" in the vessel. which..", etc.
