论文题目 Title	匈牙利和欧盟对华关系比较（2012-2023） Comparison of Hungary and EU in relations with China (2012-2023)		
论文简介 Summary	Barnabas Dros Abstract In the course of the research, I compared Hungary's and the European Union's relations with China between 2012 and 2023, mainly from a foreign policy and foreign economic perspective. The research is multi-disciplinary, relying heavily on primary sources, but I have used mostly secondary sources, furthermore I used not only European but also Chinese sources to achieve objectivity. My three hypotheses are the followings: „Hungary’s and the European Union's relationship with China differs also because the EU is trying to act as a global player, while Hungary, as a small country, wants to improve its own situation with the means at its disposal.”; „The obsolescence of the international order is one of the main drivers of change in the development of relations with China.”; „The EU’s and Hungary's relations with China have differed significantly over the period of the research.” Two of the hypotheses were proven and one was refuted. My research question is: „Between 2012 and 2023, how did Hungary's and the European Union's relations with the People's Republic of China develop, and why, in which cases and periods did they cross or diverge?” The aim of the research was to map the increasingly complex relationships in the context of the transformation of the international order as broad a perspective as possible. The research has achieved its aim. Keywords: de-risking, international order, multipolarity, future of the EU, strategic independence
