31 March 2025

Dear Ms Viktória Fröhlich,

We just heard about your recent work on urability of exoplanets and of exomoons. As you know, every issue related to the alien life, habitability and urability of exoplanets, exomoons are very interesting for us at the German Aerospace Center.

This is why I would like to ask you to give a talk about urability of extrasolar planetary objects (planets, moons) in general and about your recent work on this topic. The talk would be presented at the EPA Seminar Series on a date which is convenient for you. Our seminars are usually on Fridays, but we can move it to another day if it is more convenient for an external speaker like you.

If you can accept this invitation, please let me know.

In case of you travel to here, we cannot pay your trip, accomodation, daily allowance or insurance. I am very sorry for that, but I hope this causes no problem.

I am waiting for your answer and I hope the colleagues here can discuss the habitability and urability topics together with you before and after your talk.

Yours sincerely,

Csizmadia Szilárd
