

Certificate of Membership and Recommendation

Gyor, 13th of May, 2025

To Whom It May Concern,

It is my pleasure to provide this certificate of membership for Mónika Hamuth for application to the Pro Scientia award.

Mónika Hamuth is a distinguished alumni member of the Széll Kálmán College of Economics and Data Science, which is the International Scientific Student Association of Széchenyi István University (She was an active member from 2022 to 2024).

As her supervisor I can state that she is a remarkable student with a strong research interest and excellent results. She is the holder of two TDK awards. She participated on the Scientific Student Conference (TDK) event in 2023 Spring, and also on the TDK event in 2023 Fall where she achieved first place with her paper, and on the TDK event of 2024 Spring where she achieved a special award. She participated on the National Scientific Student Conference (OTDK) event in 2025 Spring as well, achieving first place with her paper in the Marketing section.

Mónika also participated on the 2024 International Kautz Konferencs as co-author and presenter with the results of our research, which were then published as research article in the Journal of Infrastructure, Policy and Development (Q2 category journal) afterwards. Her second paper is currently submitted for publication in the Journal of Marketing for Higher Education (Q1 category journal). Currently we are working on the next phase of her research with another planned conference presentation and article publications.

In my opinion Mónika is a dedicated young researcher with admirable scientific experience in various research methodologies and publication processes. Based on my own experience regarding her commitment and self-motivation, I am convinced, that Mónika Hamuth is an excellent candidate for the Pro Scientia award.

Dr. László Buics

Associate Professor

Széchenyi István University, Gyor, Hungary

Program Director

Széll Kálmán College of Economics and Data Science
