

LETTER OF RECOMMENDATION

To Whom It May Concern,

I am writing to express my strong support for **Tran Thi Xuan Ngoc**'s application to the **Pro Scientia Gold Medal** as **she recently has been awarded first place in A testnevelés és sport tarsadalmi hatasal II in Testnevelés- és Sporttudományi Szekció at the 37th OTDK.**

The Pro Scientia Gold Medal is a prestigious award given to young students who achieve exceptional success in their studies, particularly in scientific student associations and the National Student Research Conference (OTDK). During the preparation time, I have had the pleasure of witnessing Tran's exceptional academic abilities and dedication to her studies.

Tran is a Stipendium Hungaricum scholarship holder student with remarkable problem-solving skills and outstanding strategic thinking. She consistently demonstrates a high level of analytical ability, often approaching complex problems with innovative solutions. Her academic curiosity is evident in her active engagement in research and her willingness to explore topics beyond the core curriculum such as her publication on Magyar Közgazdasági Társaság - Fejlődésgazdaságtani Szakosztály or reach 3rd Place in TDK Corvinus 2024 conference. This intellectual curiosity is one of the essential qualities that has contributed to her excellent academic performance. Tran has been always belong to the top 10% of her major and has been selected by Corvinus University to be the applicant for Student Excellent Award 2023 and 2024.

In addition to her academic talents, Tran is a diligent and hardworking individual. She actively participates in discussions, always bringing valuable insights and perspectives during her teaching assistant role in Institution of Economics. She also collaborates effectively with her peers and professors, showcasing strong teamwork and communication skills. Her ability to balance academic rigor with extracurricular involvement speaks volumes about her time management and organizational skills.

I am pleased to note that Tran has been able to submit her application for this prestigious award, a testament to her outstanding achievements and potential.

Given her exceptional qualities and achievements, I strongly believe that Tran Thi Xuan Ngoc is highly deserving of the Pro Scientia Gold Medal. I am confident that she will continue to excel and contribute significantly to her academic community and beyond.

Yours faithfully,

Mitev Ariel Zoltán
full professor
Chair of ETDT
Corvinus University of Budapest
