

Recommendation letter

05.12.2025

Ganji Sayyedarmin is currently in the 4th semester of the BSc in Physical Training program at the University of Pécs. His background in sports began earlier with a high school diploma in Physical Education from a sport-specific institution. Between 2019 and 2021, he worked as a strength and conditioning coach for a football team in his home country. After moving to Hungary to further his studies, he has continued his professional development and, since January 2024, he has been working with PVSZK as a strength and conditioning coach for the women's football team.

In parallel with his practical experience, he has also pursued scientific research. Last year, he began a study examining the effects of cognitive preparation on different cognitive and motor skills in youth male football players. This work was presented at the TDK conference at the University of Pécs, where it was awarded first place. He then participated in the 37th OTDK, where he also won first place in the "Versenysport, parasport I." section. Additionally, he received a special invitation to present their research at the upcoming DOSZ conference.

I recommend Ganji Sayyedarmin for the Pro Scientia Gold Medal application.

Sincerely,

Győző Horváth, Ph.D
associate professor,
TDK Coordinator
