Tárgy: Re: Request for a meeting to discuss Multidisciplinary Computational Anatomy-Based Medicine

Dear Katlina,

Can you come to Nagoya University Higashiyama Campus?

You can find our laboratory location at

<http://www.newves.org/wiki/index.php?%A5%A2%A5%AF%A5%BB%A5%B9>

My office room number is IB South 465.

Our lab staff also will help you to visit our lab.

Kind regards

Kensaku Mori

> >
> > Dear Professor Kensaku Mori,
> >
> > My name is Katalin Anna Olasz and I am a 3rd-year medical student at Semmelweis University
and a 1st-year mathematics student at the University of Szeged, Hungary. I would like to express my
sincere interest in Multidisciplinary Computational Anatomy-Based Medicine,
> > which is still an uncharted field of medicine in my country. As I want to attain in-depth insight
into MCA, I contacted Dr Makoto Hashizume,
> > Professor Emeritus of Kyushu University and Director of Kitakyushu Koga Hospital, who
encouraged me to reach out to you and gave me your email address.
> > As per his instructions, I am going to be in Nagoya between the 13th and 14th of June, I would
be honoured to meet you to discuss how I might gain further knowledge and experience in MCA.
> > As someone passionate about the intersection of anatomy, applied mathematics and
diffeomorphism, I believe that this would be an invaluable opportunity for me to learn more about
your work and potentially
> > explore ways in which I could contribute to your research, and explore potential collaborative
partnership between our institutions.
> >
> > Currently, our Clinical Anatomy Research Group at the Anatomy Institution of Semmelweis
University has been working on a project related to pelvic organ prolapse wherein
> > we are interested in exploring the trajectories of collagen fibres in the pelvic floor to gain a
deeper insight into the genesis of this condition, and the progress of this disease based on function
loss due to structural problems.
> > We believe that your expertise in Multidisciplinary Computational Anatomy-Based Medicine
would be indispensable in advancing our research in this area.
> >
> > I appreciate your valuable time and attention and I am looking forward to hearing back from you.
I hope we can have a fruitful discussion in the near future.
> >
> > Please find attached my curriculum vitae and the recommendation letter from the Director of the
Anatomy Institution of Semmelweis University addressed to Dr Makoto Hashizume, my initial contact.
> >

> > I have copied in this email Dr. Gábor Baksa, leader of our Research Group and my supervisor as well.
