

International Symposium on
**Advanced Macromolecular Systems
Across the Length Scales**

**„Smart, Nanostructured Systems
for Controlled Molecular Release
and Biological Interfaces“**

**June 3-6, 2012
Siófok, Lake Balaton, Hungary**

**Programme Booklet
&
Abstract Book**

P-1	Antireflective nanostructured coatings with controllable surface morphology Á. Detrich, M. Nyári, Z. Hórvölgyi, E. Volentiru
P-2	Poly(ethylene oxide) layer prepared by "grafting-to" method as a react platform for immobilization of bioligands S. Popelka, V. Proks, F. Rypacek
P-3	Optical properties and sensorial application of surface modified zinc peroxide thin layers D. Sebők, I. Dékány
P-4	Preparation and characterization of antibacterial coatings from silver containing chitosan and semiconductor materials E. Volentiru, Á. Detrich, Z. Hórvölgyi, Z. Molnár, M. Dabóczi, J. Kabai
P-5	Water-Developable Poly(2-Oxazoline)-Based Negative Photoresists V. Schenk, F. Wiesbrock, L. Ellmaier, E. Rossegger
P-6	Time-resolved in-situ investigation of silver nanocrystal during the solvent evaporation - GISAXS based studies K. Vegso, P. Siffalovic, M. Jergel, E. Majkova, M. Weis, S. Luby, A. Buffet, M. A. Kashem, S. V. Roth
P-7	Combating microbial adhesion on alloys of industrial importance L. Románszki, I. Datsenko, J. Telegdi, W. Sand, L. Nyikos
P-8	Bioactive surfaces containing poly(ethylene oxide)-peptide conjugates R. Trzcinska, A. Utrata-Wesołek, P. Suder, A. Bodzon-Kulakowska, A. Dworak, J. Silber, B. Trzebicka
P-9	Site selective surface modification of plastic biochips and microfluidic structures for biomolecule immobilization S. Köstler, S. R. Scheicher, K. Krammer, T. Mohan, R. Kargl, H. Pichler, A. Rudorfer, K. Stana-Kleinschek, V. Ribitsch
